

EVOLVE ANYWHERE WITH MICROSOFT TEAMS

Evolve Anywhere with Teams is Evolve IP's **Microsoft Teams Direct Routing** solution that is tailored to meet the unique needs of business' environment and dramatically **increase productivity**. Our **natively integrated** Microsoft Teams solution delivers PSTN dial tone, advanced PBX features and contact center functionalities, while providing a **seamless end-user experience**.

Most businesses are looking for a solution that can support both, at home collaboration and more traditional in-office communication needs, leveraging the world-class solutions that they already use such as Microsoft Teams. Evolve Anywhere with Microsoft Teams is designed to help customers successfully manage these unique business requirements of today's 'new normal' and support a hybrid work environment.

Why choose Evolve Anywhere with Microsoft Teams?

Evolve IP has been delivering Microsoft Teams Direct Routing since it was first available. Our solution is a native integration between the Microsoft Cloud, and Evolve IP's Global Voice Cloud, and that means it can deliver a seamless end-user experience and work everywhere, on every device without 3rd party bots or browser concerns.

As a Microsoft Gold Partner and CSP, Evolve IP has access to Microsoft experts and can provide 24x7x365 US based support.

Key Features

Our head start in the market also means that we provide features others cannot such as:

- Business SMS
- Call Recording with Voice AI
- Contact Center Integrations
- Receptionist applications
- Multi-level auto attendants, advanced hunt groups, analog ports
- CRM Integrations
- Service Management & Business Continuity via OSSmosis
- SIP phone compatible
- Number porting & global presence
- All of the world-class collaboration features from Microsoft Teams

Key Differentiators

- Natively integrated with world's top collaboration platforms
- Powered by our global enterprise-class Cisco Broadworks voice network
- Supports hybrid deployment and traditional phone system requirements
- Proprietary IP that enables us to continuously add unique applications and features no other provider has
- Seamless Teams end-user experience
- 99.999% availability and business continuity
- One stop shop for integrated cloud solutions

According to Gartner, by 2024, 80% of organizations will prioritize collaboration and meeting platforms over telephony when defining unified communications portfolio strategy, up from 30% in 2019.
