

Cyberattackers have the advantage.

TAKE IT BACK

with Advanced Network Intelligence

Attackers know how to sneak past your perimeter defenses. That's why ExtraHop Reveal(x) 360 offers the complete network visibility you need to detect threats post-compromise, even in hard-to-spot places like encrypted protocols.

With the help of machine learning, real-time detections, intuitive workflows, and packet-level insights, Reveal(x) 360 gives you the power to stop attacks fast—before damage is done.

SELF-GUIDED DEMO

Test the Full ExtraHop Reveal(x) Experience

Discover how to detect, investigate, and respond to threats fast—all while exploring the full Reveal(x) user interface. Try our self-guided attack simulations:

▶ DEFEAT SUNBURST

▶ BE THE HUNTER

▶ STOP A BREACH

▶ STOP LOG4SHELL
EXPLOITS
