F5 API SecureEssentials

Streamlined API Protection for Modern Applications

Quick Reference

Transform Your API Security Posture

APIs are a critical component of your modern apps. Yet they represent an expanding attack surface that traditional security controls struggle to protect—especially in hybrid and multicloud environments. F5® API SecureEssentials delivers comprehensive protection through a streamlined SaaS model to secure APIs without the complexity of managing hardware or software.

Automated API Discovery

Continuously identify and inventory all API endpoints across your environments, including shadow and zombie APIs that may expose your organization to risk.

Real-Time Protection

Defend against common API threats with advanced security capabilities that include rate limiting to prevent abuse and malicious user detection powered by machine learning.

Simplified Deployment

Implement protection quickly and efficiently with a SaaS-based solution delivered via the F5® Global Network to eliminate operational complexity.

Scalable Security

Expand protection as your API footprint grows. F5 security keeps pace with modern development cycles and changing business needs without increasing management overhead.

Take advantage of a CDW exclusive offer for your organization with F5 and CDW bundled offerings for comprehensive API security.

Distributed Cloud Services Base Package

MSRP \$2,163 per month

Deploy basic architecture and tools to support app and API security. Includes web application firewall and DDoS mitigation.

CDW EDC #8228265

Minimum Quantity: 1

Distributed Cloud Mesh Rate Limiting Load Balancer

MSRP \$8.00 per million requests per month

Prevent abuse or denial-of-service attacks with API rate limiting and malicious user detection.

CDW EDC #8228265

Minimum Quantity: 10

Distributed Cloud Mesh API Discovery

MSRP \$630 per app instance per month

Analyze application traffic to discover API endpoints and schemas, authentication, and sensitive data.

CDW EDC #8228265

Minimum Quantity: 5

Distributed Cloud Mesh API Protection

MSRP \$263 per million requests per month

Secure APIs at every lifecycle stage by addressing potential vulnerabilities and continuously monitoring for new threats.

CDW EDC #8228265

Minimum Quantity: 5
