FORTINET FEDERAL

Proven Cybersecurity Built for Government Agencies

Partner with Fortinet Federal for a Better Path to Secure Modernization

United States government agencies are under increasing pressure to modernize legacy infrastructure, strengthen cyber resilience, enable AI securely, and do more with limited resources, all while defending against increasingly sophisticated cyberthreats.

Fortinet Federal delivers proven cybersecurity and secure networking solutions for the United States government. By combining industry-leading innovation with federal-focused governance, compliance, and supply chain integrity, we help agencies modernize securely, reduce operational complexity, and protect critical, high-value assets.

Fortinet is recognized in 11 Gartner® Magic Quadrant™ reports based on the Fortinet Security Fabric. Powered by a single OS, Fortinet solutions are recognized across hybrid mesh firewall, wired and wireless LAN, and SASE, delivering shared policy, faster innovation, and lower cost across Gartner segments.[1]

Dedicated to Government Cybersecurity

Fortinet Federal, Inc. is a wholly owned, independently operated subsidiary of Fortinet, Inc. dedicated exclusively to serving the U.S. federal government and the defense industrial base.

Our sole focus is helping government organizations achieve mission success. With more than two decades of federal deployments across civilian, defense, and intelligence environments, Fortinet Federal delivers trusted, high-performance solutions that protect government users, data, and networks.

One Platform. Better Outcomes.

Effective modernization improves security while decreasing complexity. Rather than stitching together dozens of disconnected security products, Fortinet delivers an integrated security and networking platform that helps agencies:

- Simplify cybersecurity operations
- Improve visibility across the enterprise
- Accelerate deployment
- Lower lifecycle costs
- Respond to threats faster
- Increase overall operational efficiency

Our broad, integrated, and automated platform includes converged security and networking solutions covering networks, endpoints, and cloud deployments. Integrated, centralized, AI-powered threat intelligence delivers comprehensive, consistent security, simplified operations, and faster response to threats. The result is stronger security with fewer management silos, fewer integration challenges, and better use of taxpayer resources.

Helping Government Agencies Secure AI

AI is transforming government operations, but it can also increase risks without proper governance. Fortinet Federal delivers the security foundation agencies need to confidently adopt AI, combining integrated cybersecurity capabilities with intelligence-driven protection to safeguard data, infrastructure, and mission operations. Fortinet Federal helps ensure that innovation does not come at the expense of security.

The Fortinet Federal Advantage

Meets federal standards

Strong governance and a tightly controlled federal supply chain ensure government customers receive secure, federally compliant technology.

Fortinet Secure Networking

Our high-performance solutions converge security and networking into a unified architecture that supports zero trust, integrates AI-powered threat intelligence, and delivers future-ready cybersecurity strategies.

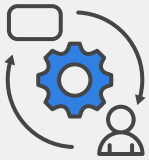
Superior ROI and time to value

The Fortinet Security Fabric simplifies architectures, accelerates deployment, and reduces technical debt, lowering TCO compared to traditional multivendor environments.

Easy to buy

Fortinet Federal solutions are available through many of the federal government's preferred acquisition vehicles, including:

- SEWP V
- GSA MAS
- EIS
- CIO-SP
- Other GWACs and agency-specific contract vehicles



The Fortinet Security Fabric delivers consistent protection across the agency to:

- Strengthen zero-trust architecture
- Secure hybrid and multi-cloud environments
- Deploy secure SD-WAN
- Protect operational technology (OT) and edge environments
- Integrate AI-enabled, defensive capabilities and operations

We partner with resellers, including small and disadvantaged businesses, telecom carriers, and federal systems integrators. Our experienced federal sales team and partner ecosystem help agencies identify the strategy that best supports their acquisition requirements.

Why Fortinet Federal Is the Right Partner

Every federal mission is different. Our commitment remains the same. Fortinet Federal works alongside agencies to design cybersecurity strategies that support evolving priorities while delivering measurable operational value.

Fortinet Federal delivers the industry expertise, innovation, and dedicated federal support agencies need to modernize securely, strengthen cyber resilience, and confidently meet the security challenges of today and tomorrow.

The Fortinet Federal team is dedicated to trusted cybersecurity for government. For additional information and support designing and implementing the most cost-effective and future-proof solution for your organization, contact Fortinet Federal at info@fortinetfederal.com or at 1-833-386-8333.
