Solutions Brief | Department of Revenue

Intelligent scanning for accelerated digitization

Revenue agencies across the country process millions of payments each year, amounting to billions of dollars collected and distributed to agencies and departments that provide government services.

While each state runs their Department of Revenue differently, they all share a common struggle: the need to process high-volumes of forms—for taxes, licensing, auditing, compliance, and more—quickly and accurately.

Providing the most efficient way to digitize, organize, and save information is what Fujitsu scanners are built for. With Fujitsu imaging solutions, even handwritten requests are processed accurately. Long wait times to pay fees in person, for business licensing, taxes, etc., are decreased. And case management is expedited, providing faster processing at a lower expense.

FUJITSU

Intelligent scanning for accelerated digitization

Digitized records for better case management

Fujitsu scanners help the Department of Revenue improve productivity by scanning automatically and getting the job done right the first time. Using high-quality Fujitsu imaging solutions, licensing clerks, tax auditors, case processors, and more are able to:

- Quickly and easily scan and digitize large volumes of papers quickly—for easy upload to a document management system or Cloud repository

- Use the scanner intuitively—there's a minimal learning curve and no training needed

- Expedite requests and help taxpaying citizens faster

- Produce exceptionally clean images—even of hard-to-capture items like handwritten applications

- Improve the accuracy of record keeping—reducing duplications, misfiling, and loss

- Maintain records that show compliance

- Free up space for other purposes used by filing cabinets or stored documents

Save time, costs, and space by scanning:

Property and business tax forms

Business license applications

Unclaimed money requests

Applications for motor vehicle licenses

Traffic court subpoenas

Special permits applications

Abandoned property affidavits

Debt statements

Receipts

IDs

Scale the solution to fit your needs

Fujitsu provides DORs with easy-to-use digital-document automation technology for swift and accurate data capture through scalable and adaptable solutions. To meet the unique needs of your agency or department, we recommend the following model:

Fujitsu fi-7600 Image Scanner

This heavy-duty production scanner handles large volumes of all kinds of documents—from thin paper and plastic cards to envelopes and long-format documents—reliably, all day long.

- Load up to 300 sheets at a time

- Scan fast—up to 100 ppm means you get more done in less time

- Feed papers for scanning of various thickness and size—this scanner can handle it all

- Superior paper-feeding technologies reduce paper jams and scanner downtime

- Powerful PaperStream IP software automatically cleans up color documents for improved reproduction and reduced file sizes
