

GoGuardian Admin is the *#1 choice* for K-12 web filtering, ensuring safer, more focused classrooms.¹

Trusted by more than 117,000 educators.

Protecting more than 12.7M students online.

91% of educators favor GoGuardian Admin for keeping their students and community safe.

COMPATIBLE WITH

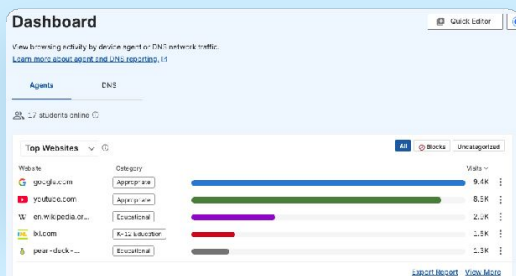

Windows

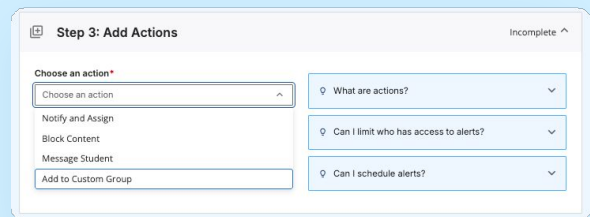

Apple

chromebook

Comprehensive content and image filtering in a single, intuitive dashboard. Block harmful content and manage policies on any browser or OS and tailor rules by school, grade, class, or student.

Automate follow-ups: Set up automated actions to block, notify admins, show a preset message, or add to custom group when alerts are generated.

187B+ sites scanned annually

1M+ harmful and malicious sites categorized

35K proxies blocked daily

“With the machine learning and AI built in we’re finding things that no other filter on the market I believe could find.”

Mike Daugherty, Director of Technology
Chagrin Falls School District

“What’s not to like about GoGuardian Admin? It has all the features that we want in one single pane of glass.”

Gary Lambert, Director of 21st Century Learning
Beekmantown Central School District

More Features

- **Smart filtering:** AI proactively identifies and blocks proxies and harmful content.
- **Theft recovery:** Filter lost devices and track them by serial number, user info, and location history.
- **Custom groups:** Create tailored filtering rules for individual students or groups.
- **Allowlist:** Approve trusted sites to keep the focus on critical alerts.
- **DNS precision filtering:** Get granular control over filtering rules and protect all devices on your school network.
- **Policy simulator:** Test if a website or video is blocked for specific users or groups.
- **Role-based access:** Assign custom roles and access roles to fit a user’s needs.
