-

Organizations use AppSheet to enable their workforce to build custom apps and automations without compromising security and governance.

Case Study: Globe

- Created 141 business process automation apps to enhance efficiency
- Reduced audit report times from two weeks to one to two hours
- Bolstered security by migrating employee data storage to Google Drive
- Reduced business process turnaround time by 79.8%

We're here to support your transformation journey

We've always been on the lookout for grassroots innovations among our employees at Globe. It is something that we're very keen on cultivating for our people. AppSheet gave us this flexibility – the perfect tool to mine these innovative minds. It allows us to quickly execute and transform how business is done and improve how we serve our customers.
