

Prepare your environment for confident Gemini Enterprise adoption.

CDW AI Readiness and Security Assessment for Google Gemini Enterprise

The rollout of Gemini Enterprise can help organizations accelerate AI productivity, but success depends on first validating the data, identity, IAM and security controls that determine what AI can safely access. The CDW AI Readiness and Security Assessment for Google Gemini Enterprise removes the guesswork by evaluating your Google Workspace and Google Cloud environments across identity and governance, data source readiness, data security, security posture, licensing, and organizational readiness. The result is a prioritized, sequenced roadmap that gives CIOs and CISOs a defensible foundation to derisk and accelerate Gemini Enterprise deployment.

CDW AI Readiness and Security Assessment for Google Gemini Enterprise can help you achieve:

**Operational
Efficiencies**

Agility

**Reduced
Risk**

Finding the Right Solution

CDW's AI Readiness and Security Assessment for Google Gemini Enterprise is a structured, fixed-duration engagement designed to help organizations move from AI interest to confident deployment. Delivered remotely by CDW's certified Google Cloud practitioners, the assessment evaluates six targeted workstreams to clarify readiness, strengthen governance and identify the steps that support a secure, successful Gemini Enterprise rollout.

The value of this engagement is the roadmap: a prioritized, severity-rated action plan that translates findings into a clear sequence of next steps. Instead of leaving teams to determine where to begin, CDW helps customers focus on the highest-impact actions first, giving technical and executive stakeholders a clear understanding of their security posture and practical path to accelerate adoption while maintaining the right guardrails.

CDW + GOOGLE CLOUD

CDW has built a deep, practice-level partnership with Google Cloud — bringing together certified Workspace and Google Cloud specialists who understand how identity, data governance, security controls and AI workloads intersect in enterprise environments. Our practitioners have hands-on experience with the specific platforms and configurations that determine Gemini Enterprise success: Cloud Identity, Security Command Center, IAM org policy, VPC Service Controls, and the full Workspace Admin ecosystem. CDW's independence means we assess your environment objectively — not to sell you a specific tool, but to give you a clear, honest picture of where you stand and what to do next.

Why CDW and Google Cloud:

- **Integrated Google Cloud expertise:** CDW brings experience across Google Workspace, Google Cloud security and enterprise identity ecosystems, including Okta, Microsoft Entra ID and SCIM.
- **Low-disruption assessment approach:** CDW conducts read-only environment reviews with no configuration changes, helping teams gain clarity without interrupting operations.
- **Proven readiness framework:** CDW evaluates identity, data security, compliance, licensing and AI readiness through a structured approach built for enterprise environments.

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

Services Overview

The following phases and outcomes are available as part of the CDW AI Readiness and Security Assessment for Google Gemini Enterprise engagement:

Phase	Outcome
Kickoff and Discovery Workshops	Aligns stakeholders on project goals, logistics, access requirements and the business priorities driving Gemini Enterprise readiness.
Technical Environment Review	Establishes a read-only technical baseline across Workspace Admin Console, Google Cloud IAM and org policy, Security Command Center and network configurations.
Documentation Review	Creates a policy and governance baseline by reviewing existing security policies, data governance documentation and organizational structures.
Findings Synthesis and Roadmap Development	Translates assessment findings across identity, data source readiness, data security, security posture, licensing and organizational readiness into a prioritized, severity-rated roadmap.
Executive Readout	Provides leadership with an executive summary of findings, recommended next steps and a clear path to advance Gemini Enterprise with confidence.

Proof points

- Google Cloud Partner:** CDW is a recognized Google Cloud Partner with validated delivery capabilities across Google Cloud and Google Workspace.
- Google Workspace Authorized Reseller:** Certified to sell, deploy and support Google Workspace enterprise editions including Gemini Enterprise SKUs.
- Security Specialization:** CDW practitioners hold Google Cloud Professional Security Engineer certifications supporting SCC, IAM and VPC Service Controls assessments.
- Google Cloud Professional Architect:** CDW solution architects hold Professional Cloud Architect credentials validating Google Cloud org design and configuration expertise.
- Multi-cloud practice depth:** CDW delivers across Google Cloud, AWS and Azure, providing cross-platform context when assessing identity federation and compliance posture.
- Established Google Cloud practice:** Dedicated Google Cloud practice with tenured engineers experienced in Workspace admin console, Google Cloud IAM/org policy and Security Command Center deployments.
