

2021-2022 CloudReady and Chrome Education Upgrade Offer

Repurpose the older devices you already own and expand your school's Chrome OS deployment

Give new life to your old hardware

Based on Google's open-source Chromium, CloudReady is an operating system that breathes new life into your existing PCs and Macs. By replacing aging operating systems and local apps with a lightweight OS that won't slow down over time, you can increase learner access to fast, secure, managed devices.

And when paired with Chrome Education Upgrade, CloudReady devices can be enrolled alongside your other Chrome OS devices in Google Admin console, unifying your fleet management with the same managed access, simplified deployment, and advanced security.

1. Learn more

Visit g.co/chrome/cloudready to determine your eligibility and learn more about CloudReady & Chrome Education Upgrade.

2. Get started

Complete the form to speak to the CloudReady team.

3. Complete your purchase

Buy five or more Chrome Education Upgrades.

4. Confirm your purchase

We'll verify your purchase and issue your CloudReady licenses.

5. Install & deploy

Start turning your existing hardware into CloudReady devices.

Introducing a limited-time offer

Purchase 5 or more Chrome Education Upgrades – up to 500 – and receive the same number of CloudReady licenses at no charge for the first year.

After that, transfer those Chrome Education Upgrades to new Chromebooks within the first year or continue with paid CloudReady licenses.

Fast

CloudReady installs in just minutes, so you can begin transforming devices immediately

Easy

Use Chrome Education Upgrade to manage CloudReady devices alongside your Chromebooks in Google Admin console

Portable

Transfer Chrome Education Upgrades from CloudReady devices to new Chromebooks within one year at no additional cost

Flexible

Repurpose existing hardware that's unused or underutilized: CloudReady is certified on more than 450 devices, including the most commonly used devices in education
