# Accelerate Team Productivity With Generative AI

Grammarly helps organizations innovate and scale with enterprise-grade generative AI. With just a few clicks, team members can instantly compose, ideate, rewrite, and reply using context within existing workflows.

→ **Cut the Cost of Routine Work**
Speed up composition in existing workflows and reduce time spent on revisions so teams can focus on high-value work.

→ **Communicate With Quality**
Create relevant, high-quality content with generative AI assistance that understands your context, writing style, and goals.

→ **Gen AI You Can Trust**
Confidently use generative AI built with the highest standards for enterprise data security, user privacy, and responsible AI.

How Generative AI Can Help

Marketing
Produce content faster while elevating quality.

Sales
Save time generating engaging outreach and email replies.
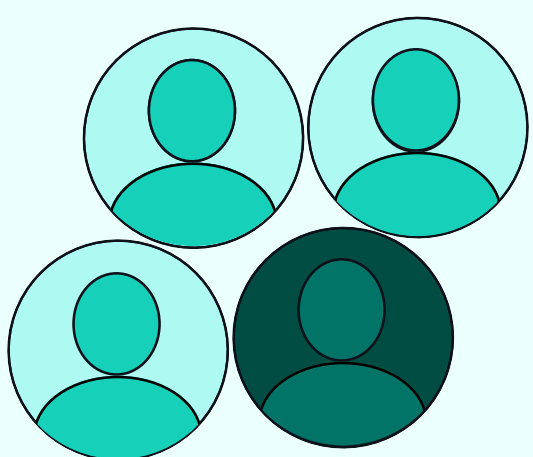

CX
Respond faster with more contextual communication.

HR
Support teams and reduce organizational busywork.

IT
Help teams securely generate text in existing workflows.

3 out of **4** | working professionals believe that **generative AI can help them be more productive.***

Product Features

→ **Compose**
Accelerate your team's work by prompting Grammarly to instantly compose high-quality writing at scale.

→ **Ideate**
Unblock your team's writing and speed up content creation with generative AI assistance that helps brainstorm ideas and outlines based on a prompt.

→ **Rewrite**
Help teams instantly improve communication by using suggested rewrites to transform text for tone, clarity, length, and more.

→ **Reply**
Help teams save time and draft thoughtful email replies in an instant with context-specific, one-click prompts.

→ **Personalize**
Set tone and style preferences to generate more personalized writing across platforms.

Enterprise-Grade Security

Built on 14 years of AI expertise and backed by the highest certification and regulatory compliance standards, Grammarly is the most secure generative AI solution available across platforms.

> "Grammarly is built to understand a person's writing style, voice, and intent so it won't sound like it's coming from a bot."
