

## Drive everything you need with HPE GreenLake edge-to-cloud platform

Manage your hardware, cloud resources, and workloads – all in one place

Enterprises face big challenges when it comes to managing multi-generational IT across their edges, datacenters and clouds.

The **HPE GreenLake platform** enables you to achieve your business outcomes...

...delivering value to **everyone** in the organization

### Line of Business Owner

“Using the platform I can find the services I need for new projects and have confidence that my production workloads are secure.”

### CIO / CFO

“Innovation happens quickly thanks to a holistic view of cost and risks, insights from analytics, and instant access to on-demand services.”

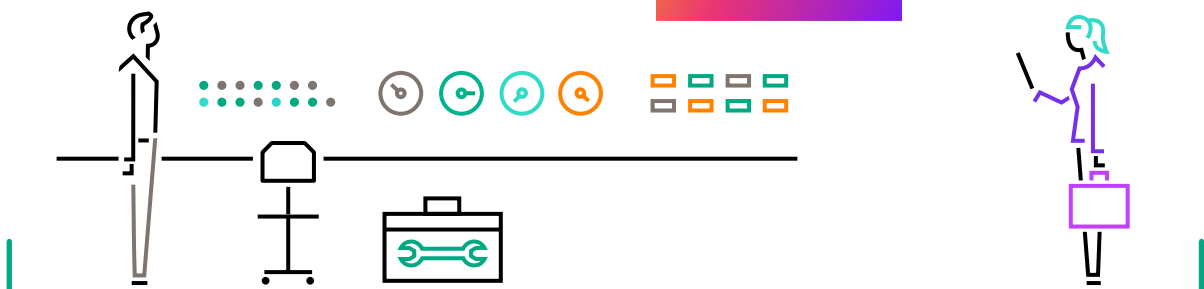

### Administrators

“I can centralize management of network, storage and compute to deploy where needed and keep things secure.”

### Developers

“Deploying apps successfully depends on faster insights, app velocity and flexible access to resources anywhere.”

The HPE GreenLake platform simplifies your operations by giving you **one place to go for managing at all levels** across your data centers, edges, colocation facilities, and public clouds.
