

# HPE Alletra

Power your data from edge to cloud

With data distributed across many locations, from edge to cloud, where can you turn to get the agility you need?

Cloud-native data infrastructure is the answer

**91%**  
of organizations agree that mature cloud operations on-premises is the single most important step to eliminate complexity<sup>4</sup>

|                                                             |                                                |                                                  |
