Honeywell

OUR MISSION

Honeywell is committed to enable supply chain operations across industries to evolve their operations with assistive technology, intelligent data and business process optimization software that enhances the customer experience from order to delivery, improves the employee experience from recruiting to retention, and digitally transforms processes from automation to analytics.

30+ YEARS SUPPLY CHAIN DOMAIN EXPERTISE

Honeywell's unique portfolio of business intelligence software and labor productivity tools has been a driving force throughout the worldwide supply chain for more than 30 years, building on leading brands and technologies. Honeywell supply chain solutions are fit-for-purpose in a wide variety of fulfillment applications, cold storage facilities and demanding operations that need to transition their manual workforce to more automated, modern processes. Our flexible solutions empower workers to increase productivity, accuracy and efficiency while greatly improving their safety and overall job satisfaction.

Our focus is helping supply chain operations address today's most critical needs to prepare for the future allowing you to focus on what really matters: **Delivering exceptional customer experiences.**

PRIORITIES AND CHALLENGES FACING SUPPLY CHAIN OPERATIONS

CUSTOMER EXPERIENCE

Customer expectations have pushed supply chain operations to become faster, more accurate, and more accountable for product shipments. Improving operational productivity and efficiency can reduce order to delivery times, making for a better customer experience.

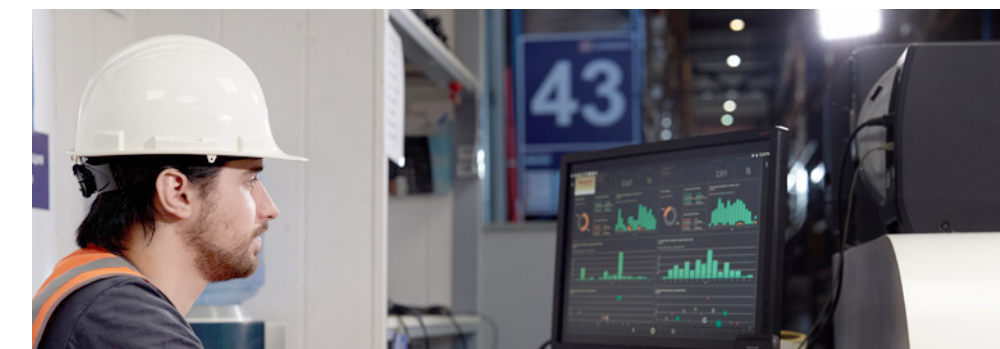

BETTER OPERATIONAL EFFICIENCY

Data-driven decisions are the path forward! Data provides the operational visibility to manage and streamline increasingly complex operations and deal with upsets as ecommerce demands grow, delivery time expectations compress, and labor shortages continue. Software that delivers data and analytics on assets, inventory and workflow performance is in demand.

WORKFORCE PERFORMANCE

By adopting advanced technologies such as cloud computing, artificial intelligence, and automation, businesses can enhance efficiency, reduce operational redundancies, and improve communication. This transformation empowers employees with tools that allow them to work more flexibly and effectively, often leading to improved job satisfaction and engagement.

HARNESSING INNOVATION AND AUTOMATION

Supply chain operations are preparing for the future and utilizing technologies that will continually improve the customer experience, cut costs and reduce labor demands. Technologies range from augmenting the worker, robotics, automation and modernized software platforms with ML and AI.

OPTIMIZE YOUR SUPPLY CHAIN OPERATION WITH HONEYWELL SOLUTIONS

Honeywell gives you end-to-end technology solutions that easily connect your people, assets, and processes to drive greater productivity, agility, and efficiency throughout your operations.

SUPPLY CHAIN BEST SELLERS

Honeywell is focused on delivering solutions that improve productivity for a range of supply chain workflows.

Our solutions empower workers to manage large amounts of information, report status updates and problems, access organizational knowledge and interact with their colleagues seamlessly.

From voice solutions and software to long-range scanners, printers, and mobile computers, Honeywell's suite of innovative productivity solutions can help streamline touch points throughout the supply chain.

*CK67 Mobile Computer**CT47 Mobile Computer*

MOBILE SOLUTIONS FOR MOBILE WORKERS

Highly mobile workers in DC and warehouse operations need their devices to keep them on-the-move. Honeywell's mobility devices combine the familiar feel of consumer devices and high-end mobile computers and tablets into single, enterprise-grade packages. Enabling devices to last up to two full shifts, our mobile solutions are built on our durable, stable and secure Mobility Edge™ platform.

Error-proof your warehouse with the industry's most advanced ultra-rugged mobile devices ready for the toughest environments.

MOBILITY

Handheld and Wearable Mobile Computers

CT47

The CT47 is released with the latest 5G and Wi-Fi 6E technology to stay connected in both indoor and outdoor environments. 5G offers the highest bandwidth and lowest latency available for transport and delivery workers, and also within a warehouse to always stay connected.

BOOST PERFORMANCE WITH:
8675i, Guided Work, Operational Intelligence

CT45 XP

The CT45 XP offers an integrated, repeatable, and scalable approach based on a common hardware and software Mobility Edge platform – achieving enterprise stability and security via incorporating a powerful Qualcomm processor that is guaranteed to support from Android® 11 throughout Android 13, Android 14 and 15 are committed subject to feasibility. The CT45 XP can also be converted into a wearable simply by adding an arm band and ring scanner or pairing with Honeywell’s Guided Work voice technology.

BOOST PERFORMANCE WITH:
8675i, Guided Work, Operational Intelligence

CW45

Setting a new standard in hands-free productivity and performance for the frontline worker. Built on the Mobility Edge for longevity and with FlexRange scanning distances, CW45 is a powerhouse wearable computer helping empower workers to improve transaction speed and throughput.

BOOST PERFORMANCE WITH:
8675i, Guided Work, Operational Intelligence, SRX3

| MOBILITY

Handhelds

CK67

CK67 Mobile Computers, built on the Mobility Edge platform, are ultra-rugged, all-purpose productivity solutions that ensure reliable performance, ergonomic design, 5G and Wi-Fi 6E data connectivity for demanding users in warehouse and distribution center environments. Featuring the latest Qualcomm® QCM4490 processor and memory technology for high-performance and demanding applications through Android® 18. With the powerful FlexRange™ XLR scan engine, the CK67 is ready for intense barcode scanning workflows to maximize end-to-end productivity.

BOOST PERFORMANCE WITH:
8675i, Operational Intelligence

CK62

The lightweight, rugged CK62 mobile computer is an ideal mid-range solution for warehouse and distribution center environments. The CK62 provides reliable and fast data access with 5G and Wi-Fi 6E capabilities for always-on connectivity in any workflow. Reliable in harsh conditions and embedded with the FlexRange™ XLR scan engine and a 7,000-mAh battery, the CK62 is ready to stand the test of your most demanding workflows, with support from Android 14 through 18.

BOOST PERFORMANCE WITH:
Operational Intelligence

I MOBILITY

Vehicle Mounted

THOR VM1A

The VM1A, built on the Android and Mobility Edge platform, is a rugged vehicle mounted computer built tough to handle harsh warehouses, ports and intermodal and manufacturing environments. Best option if you want to upgrade to a more visual modern interface.

BOOST PERFORMANCE WITH:
Granit XP 199Xi XR/XLR

RT10

The Honeywell RT10A rugged tablet is designed for rapid user adoption, minimized TCO and optimized device management. Whether you’re a supervisor or a shop floor employee, a manager or a maintenance worker, the RT10A is ready to fit into your daily workflow.

BOOST PERFORMANCE WITH:
Granit XP 199Xi SR/XR/XLR

*8675i Wearable Scanner**Granit Ultra Scanner**HF810/811 Fixed-mount scanner*

SCANNING SOLUTIONS FOR INDUSTRIAL DEMANDS

State-of-the-art scanning systems are a necessity for today's distribution centers and mobile workforces. Throughout Honeywell's years of innovation in the industry we serve, we've developed a variety of scanners to meet your every need and to help you achieve better outcomes.

Ultra-reliable Industrial and Wearable Scanners

Even in challenging working environments, you can trust our handheld, industrial-grade barcode scanners to provide superior durability and reliability. Our scanners are encased in waterproof and dustproof housings and rubberized to reduce damage from falls or tumbles, providing a long life cycle and low cost of ownership. Our scanners are perfect for fastpaced, high-volume barcode scanning.

INDUSTRIAL SCANNERS

Handheld

GRANIT ULTRA

Granit Ultra Scanner – Ultra-scan performance, ultra durability and ultra-easy to use. The Granit Ultra is an ideal scanning solution for any warehouse or distribution center environment. When you need to fulfill complex or voluminous orders, are dealing with hard-to-scan items, or trying to stay ahead of customer lead time demands, the Granit Ultra is ready to step in and optimize your scanning operations. Granit Ultra integrates high-speed processing, AI algorithms, and decoding enhancements to result in an average 45% scanning speed increase over the Granit XP, enabling improved productivity.

BOOST PERFORMANCE WITH:
VM3A, VM1A, RT10, Operational Intelligence

INDUSTRIAL SCANNERS

Wearable Scanner

8675i

Fast and accurate tracking of goods is critical to efficient operation for order fulfillment and inventory management. With FlexRange scanning distances, 8675i enables wearable scanning in applications that would have previously required a handheld device.

BOOST PERFORMANCE WITH:
CW45, CT45, Guided Work, Operational Intelligence

8680i

The 8680i Wearable Mini Mobile Computer is a cost-efficient solution driving enhanced productivity through a direct wireless connection to the host and interactive display.

BOOST PERFORMANCE WITH:
CW45, CT45, Guided Work, Operational Intelligence

8690i WEARABLE RFID MINI MOBILE COMPUTER

The Honeywell 8690i wearable device is a compact, high-performance, hands-free mini mobile computer for your business that will help you improve workflow efficiency and reduce costs. Industry-standard EPC Global Class 1 Gen 2, RFID reader ensures that the 8690i can read all common supply chain RFID tags.

BOOST PERFORMANCE WITH:
CW45, CT45, Guided Work, Operational Intelligence

I INDUSTRIAL SCANNERS

Industrial Fixed Mount

HF810/11

Fixed-mount scanners equipped with a liquid lens enabling automation to track, trace and control movement of goods throughout DCW workflows.

With Honeywell's enhanced technology in encoding and decoding, HF810 and HF811 Fixed-mount 2D Industrial Scanners offer powerful performance, including DPM capabilities, in a compact form factor that can be networked to build a complete manufacturing or warehouse management solution for end users.

HF810 Fixed-mount Scanner

HF811 Fixed-mount Scanner

*PX940 Industrial Printer**PM65 Industrial Printer*

PRINTING SOLUTIONS FOR CONSISTENT WORKFLOWS

From desktop to industrial to mobile, Honeywell printers are the clear choice for a wide variety of labeling applications. The built-in “smarts” of our industrial printers mean greater efficiency and lower cost, with wired and wireless solutions for all high-demand printing needs. Our industrial printers are quiet, compact, intuitive and reliable – with a range of configurations designed to excel in your business environment. Our mobile printers are built to withstand punishing field conditions, enabling a full day of printing without recharging.

Built on Honeywell Printer Edge™, a smart connected printer platform with easy setup, quality output, enhanced security, and the simplicity of a single software toolkit for your printer network.

| PRINTERS

Industrial Printers

PM45/45C

The PM45 printer is the first industrial printer with WWAN connectivity designed for M2M and IoT applications. Asset Intelligence MDM tool provides predictive analytics and data on printer health, while SOTI and PrintSet MC are also supported. Smart printing capability allows users to configure and print without the need for a host computer.

PM65

The Honeywell PM65 industrial printer offers high quality printing along with remote configuration and diagnostics functionalities that increase production efficiency and supply chain transparency. Based on the Printer Edge(TM) platform, The PM65 supports printer remote control, so you can see and control the printers from a remote computer and provide real-time diagnosis and technical support.

PD45/PD45S

The PD45 is a commercial grade industrial printer, which is suited for manufacturing, transportation and logistics, and government applications. The PD45 is available with standard features such as smart printing capability, in which users can configure and finetune settings without the need for a host computer by running apps right inside the printer – minimizing the need to connect to a PC.

PX940

The PX940 family of high-performance industrial printers with integrated label verification technology provides error-free printing. Developed for companies that are subjected to fines levied for non-compliance to regulatory standards, and returned shipments due to unreadable barcodes, the PX940 series prints barcodes that are defect-free and 100% accurate every time. The fully integrated verifier allows for quick setting up even when printing and verifying different labels.

BOOST PERFORMANCE WITH:
Operational Intelligence

| PRINTERS

Mobile Printers

RP2F/RP4F

The RPf series of printers provides big productivity gains and reduces errors by enabling workers to print labels at the location they need, so labels can be applied when and where they need to be applied. RPf printers come with powerful CPU and smart power management — allowing smooth, continuous operation so your workers can work efficiently with less media reloading, battery swaps, and downtime.

RP2f Mobile Printer

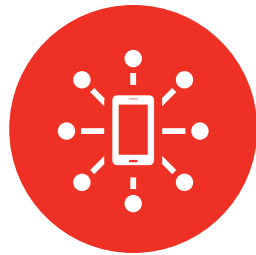

RP4f Mobile Printer

THE FOUNDATION OF OUR HARDWARE SOLUTIONS

MOBILITY EDGE™
Mobility Edge™ is a stable and secure platform upon which our mobility devices are built. It enables you to:

- Accelerate deployments with a versatile out-of-the-box capabilities and a rapid provisioning suite
- Optimize business performance with embedded tools that drive faster data capture and secure, enhanced worker communications
- Extend device lifecycle with an enterprise-wide approach to patch releases and hardware designed to support twice the operating system upgrades
- Strengthen security by providing a unified, dynamic hardware-and-software platform that enables enterprise IT to deliver solutions across your business

PRINTER EDGE™
Honeywell Printer Edge™ gives businesses the simplicity of a single printer operating system with:

- Simple network integration and a consistent user experience via an intuitive interface across all printer models
- Strengthened printer security and less vulnerability with data encryption
- Single Software Toolkit with dashboards and process automation capabilities aid in setup and troubleshooting

VOICE AUTOMATED SOLUTIONS

Continuing our legacy as a pioneer in voice technologies, Honeywell voice automated solutions are fit-for-purpose in a wide variety of fulfillment applications, cold storage facilities and demanding operations that need to transition their manual workforce to more automated, modern processes.

SRX3 Wireless Headset

A700X Series

VOICE AUTOMATED SOLUTIONS

Software

GUIDED WORK

Honeywell's Guided Work solution is a flexible platform that provides options from general purpose, purpose built or a hybrid of technologies. Voice software performs on Andriod, iOS and Honeywell foundational Talkman series.

BOOST PERFORMANCE WITH:
CW45, CT45 XP, 8675i

Hardware

A700X SERIES

Today's DCs require optimized and flexible solutions that maximize technology investments and empower mobile workers. Honeywell's A700X series of voice-enabled mobile devices help deliver hands-free and eyes-up efficiencies that help your workers increase workflow productivity and accuracy.

BOOST PERFORMANCE WITH:
SRX3 Wireless Headset, SR-35 Wired Headset

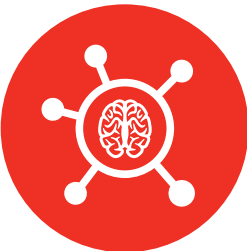

SRX3 WIRELESS HEADSET

Raising the standard in mobile workforce ergonomics, productivity and accuracy while enabling voice-directed workflow efficiencies. Superior speech-recognition technology and flexible configurations empower your mobile workforce to excel in a variety of demanding applications such as warehouse, distribution center, and fulfillment environments.

HONEYWELL SOFTWARE SOLUTIONS DESIGNED TO EMPOWER YOUR SUPPLY CHAIN OPERATIONS

WORKFORCE INTELLIGENCE

Unite people, processes, and technology to deliver better visibility into site operations, allowing your maintenance and operations teams to make informed decisions in real-time.

- Task Management
- Incident Response
- Workforce Insights
- Enterprise Integration

OPERATIONAL INTELLIGENCE

Honeywell Operational Intelligence is a SaaS solution that uses advanced insights and analytics to proactively identify operational issues, take action to provide solutions, and improve ROI.

- Find Missing Devices
- Improve accountability with Check-out/Check-in feature
- Reduce worker disruption from battery issues
- Proactively monitor device data points for anomaly detection

SMART TALK

Honeywell Smart Talk is a unified workforce communications solution that tackles fragmented communication in organizations. It is a device-agnostic app that functions on Android, iOS, and web browsers, offering secure:

- Push-to-Talk
- Voice and Video Calls
- Text and Media Messaging

All in a single application.

SWIFTDECODER

SwiftDecoder is a software development kit (SDK) designed for integrating barcode scanning and optical character recognition capabilities into mobile and embedded applications. Leveraging vision technology and advanced algorithms, SwiftDecoder seamlessly operates across platforms, allowing businesses enhanced flexibility in choosing the right tools for their teams.

It supports the following workflows:

- | | |
|-----------------------|---------------------------------|
| • Batch Scan | • Label Capture |
| • Continuous Scan | • Optical Character Recognition |
| • High Speed Scanning | • Augmented Reality |

HONEYWELL ENTERPRISE MANAGEMENT

In today's world, mobility devices are the lifeblood of business. No matter where they are deployed – on a busy airport tarmac, in a demanding warehouse environment, or weathering the elements outdoors – you need them to work. Even more so, you need to protect those devices so your team stays online and on schedule.

Honeywell Enterprise Management provides end-to-end coverage for your deployed solution, regardless of what operating system it runs, whether it's rugged or enterprise use, or what brand is on the back. If you've got it, we cover it.

COMPREHENSIVE DEVICE MANAGEMENT

Honeywell provides end-to-end management for handheld devices, including deployment, configuration, and ongoing maintenance

MOBILE DEVICE MANAGEMENT (MDM)

Honeywell's MDM solutions allow for remote management of device settings, software updates, and security configurations, ensuring devices are always up-to-date and secure

SCALABLE DEPLOYMENT SERVICES

Honeywell's deployment services include kitting, staging, and pre-configuration of devices, ensuring they are ready to use upon arrival. These services can scale from hundreds to tens of thousands of devices

24/7 HELP DESK SUPPORT

Honeywell offers round-the-clock, multi-lingual support to ensure any issues with handheld devices are resolved quickly and efficiently

LIFECYCLE SUPPORT

Honeywell provides support throughout the entire lifecycle of the device, from initial setup to eventual retirement, ensuring maximum productivity and minimal downtime

GLOBAL SUPPORT

83 Service Locations across the globe to support all our partners

WIN WITH HONEYWELL

The supply chain environment is dynamic. Situations change quickly and you need to be able to adapt even quicker. You need to ensure you're prepared to win on every front and ensure you stand out amongst your competition.

Honeywell can help.
