

THE NEW XENON™ ULTRA SCANNER CORDLESS

As a leader in scanning technology, healthcare organizations have chosen Xenon scanners to help ensure clinicians deliver fast, accurate, and reliable patient care.

THE HONEYWELL DIFFERENCE

Patients are savvier, with higher expectations of what excellent patient care should be, going far beyond an office visit or single hospital stay.

The Xenon Ultra for healthcare is a premium evolution of the widely known legacy Xenon and Xenon XP healthcare scanners, taking our enhanced scan performance and reliability one step further.

The Xenon Ultra 1962h incorporates Honeywell's next generation of scanning capability – allowing patient care to stay top priority for clinicians, helping improve retention of employees and helping lower the total cost of ownership for hospitals.

ALL-NEW SCAN PLATFORM

Introducing Honeywell's latest scan platform, **Ultra**.

The Ultra platform utilizes optimized illumination and increased processing power that delivers up to a **20% improvement** in snappiness and scanning over the legacy Extreme Performance (XP) platform.

FEATURES AND BENEFITS

IMPROVED DESIGN

An improved design reduces the number of nooks or crannies, aiding in the reduction of lingering germs.

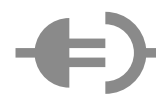

SCAN SNAPPINESS

Along with a green dot aimer to visibly enhance targeting and scan accuracy, the new scan platform empowers snappy scanning operations.

OPERATING MODES

Improves the user experience by increasing throughput, range, and connection reliability.

SAPPABLE POWER SOURCE

The Xenon Ultra 1962h can accept a lithium-ion battery or a battery-free super capacitor allowing for mixed device pools.

Honeywell

HONEYWELL XENON ULTRA

Bedside care, mobile nursing, patient identification, and therapy validation

- Anti-Microbial and disinfectant ready housing
- New processor with warm white illumination and a green LED dot aimer
- Quicker, more accurate scans with green LED dot aimer, simplifying aiming
- Swappable power sources: one scanner operates with a battery or super capacitor
- Contactless charging reduces the risk of battery corrosion or wear-and-tear
- No speaker port for germs to build up
- Object Detection (IR) enhances patient comfort by avoiding false activation to lower disturbances by activating illumination only when needed
- Enhanced Field of View (FOV)
- Artic white, sleek aesthetic design
- 3-Year factory warranty

SEAMLESS COMMUNICATION WITH NEXT-GEN SCAN TECHNOLOGY

EASY CONFIGURATION

Configure device with a simple barcode scan.

HOLISTIC SOLUTIONS

The Honeywell Scanner Management Utility (SMU) creates a holistic solution to help automate deploying and updating scanners.
