The Total Economic Impact™ Of Juniper Apstra

Through four customer interviews and data aggregation, Forrester concluded that the Juniper Apstra customer journey has the following three-year financial impact.

Some of the biggest benefits are the amount of time and cost savings associated with day zero and day one tasks, how much faster that can happen while doing it with less resources. The other benefit is the ongoing sustainability of the network because people are making changes on the controller and the controller is the one pushing the configuration. It's allowed us to have a much more standard configuration across the board.

Data center systems architect, Energy Company

––––

Composite Organization

Configuration inconsistency within data center network devices

Complicated code-intensive networking operations

Time to market

Inefficiencies in managing multiple vendor devices within a data center

$73K

60% FTE HOURS SAVED

Day zero: design and planning cost savings

$72K

90% FTE HOURS SAVED

Day one: deployment cost savings

$448K

60% FTE HOURS SAVED

Day two+: data center operations cost savings

$358K

Tools replacement cost savings
