GET AN EDGE OVER INNOVATIVE CYBERCRIMINALS

Safeguard users, applications and infrastructure against advanced threats.

62% of organizations were victimized by ransomware in 2019

46% of organizational malware infections came through e-mail in 2019

80% of organizations have been affected by a successful cyberattack in 2019

86% of breaches were financially motivated in 2019

A Tale of Two Realities

An employee works remotely and unknowingly opens a virus-laden email.

1. CURRENT WORLD

The infected laptop is brought into the network. The malware communicates with other machines, quickly replicating and morphing to be less traceable.

3 MONTHS later...

The cyber criminals retrieve the information they want. The company pays for its losses, and meets with the PR team to prepare statements.

2. JUNIPER WORLD

The infected laptop is brought into the network, and it attempts to send malware to other devices.

30 SECONDS later...

The malware is contained to the laptop and cannot spread. The breach stopped within 30 seconds because security policy is automatically enforced on every device in the network.

About Juniper

Juniper Networks® provides the ideal network for your business, that’s simple, reliable and secure. Juniper powers the top global service providers and 99 of the Fortune Global 100. More than 86 percent of smartphone traffic in the U.S. is secured by Juniper. Seven of the eight largest international stock exchanges trade across Juniper’s networks. The top 5 social media properties run on Juniper Networks, with more than 4.5 billion updates / day & 53,000+ updates / second.

Engineering Simplicity

To learn more, visit juniper.net/security

Juniper Networks removes the complexity, cost and risk associated with securing today’s complex, hybrid network environments, and replaces them with JUNIPER CONNECTED SECURITY. This solution automates security coverage from endpoints to edge, and across every cloud. See how Juniper Connected Security can protect all points of connection across your network.
