We’re All Headed Back to a New Office

As organizations start to reopen their offices post COVID-19, one thing is certain—no matter the office an employee is returning to, it’s going to feel new and different. And whether employees are working from home, in the office, or a combination of both, the requirements of the new environments employees work from present unique challenges.

Kensington crafts professional-grade security, wellness, connectivity, and mobility solutions, to ensure businesses and employees are outfitted for success, no matter the environment.

**Hot Desking Tools**

**Security**

61% of businesses experience device loss or theft.

With Kensington Lock, organizations can be confident that desk equipment won’t walk away.

Visual hacking is successful 68% of the time and takes 15 minutes or less. Privacy Screens are an easy solution for protecting on-screen data in shared spaces.

**Wellness**

Regular cleaning of shared surfaces is essential to employee health. The UV Monitor Stand kills 99.9% of bacteria and germs on high-touch surfaces like keyboards, mice, and phones, in 10 minutes, while also elevating an external monitor to proper eye level. A Washable Keyboard and Mouse can be easily cleaned regularly by submerging them in warm, soapy water.

**Connectivity**

With over 80% of organizations using more than one type of laptop brand and varying operating system types among laptops, a versatile Hybrid Docking Station offers full functionality to local employees and low TCO for IT.

**Remote Work Essentials**

**Security**

84% of cybersecurity professionals are more concerned about security now than before COVID-19 and the great resignation. With remote mobility and threats, security is on the rise. With 80% of hacking-related data breaches involving compromised or weak passwords, a multi-factor biometric VeriMark Fingerprint Key is an easy-to-use and secure solution for workers in and out of the office.

**Wellness**

32% of remote workers report back pain.

Proper posture is key to staying productive. Adding a Laptop Riser is an easy way to raise a laptop to the proper eye level.

**Mobility**

Outfitting employees for mobility can give greater flexibility to the individual and the organization. A Compact Keyboard and Dual Wireless Mouse can enable comfortable navigation and typing, while a Backpack can keep an employee’s devices and accessories in one place and ready for anything.
