What brand do more organizations worldwide rely on for high-performance memory technology?

Kingston Technology is the name to trust for performance, reliability and data security.

Kingston's longstanding reputation for quality is backed by extensive and rigorous product testing, exceptional support and a commitment to our partners' and customers' satisfaction. Every product that bears the Kingston name is built with the same uncompromising standards that have earned the company its leadership position.

We understand how critical reliable and efficient memory and storage are in today's data intensive environments. And we'll continue to deliver on our promise to create exceptional products that customers can rely on with confidence.

An extensive line of products for a wide range of applications

Computer memory

Kingston offers a complete line of compatible RAM memory for desktops, laptops and servers—thoroughly tested and backed by a lifetime warranty and 30+ years of design and manufacturing expertise. And we make it easy to select the right memory to meet your specifications.

Solid-state drives (SSDs)

Kingston's fast and reliable SATA and NVMe SSDs are an ideal way to add speed to an existing desktop PC or laptop by upgrading from a hard disk drive (HDD). They're also a great choice for those doing new PC and server builds.

USB flash drives

Kingston DataTraveler and IronKey USB flash drives, available with standard or encrypted security, provide on-the-go file storage for business or personal use.

Memory cards (SD, microSD and compact flash)

Kingston offers a range of memory card options for digital cameras, Android phones, drones, dashcams and security cams.

Memory card readers for SD, microSD and Compact Flash cards

These devices connect to a computer via USB 2.0 or 3.0 for data transfers.

The name to trust for performance, reliability and data security

For business or personal use, Kingston has it covered

Enterprise servers and data centers

With businesses worldwide processing and managing more information than ever before, Kingston is meeting the demand for reliable backup, storage and data access. From data centers and colocations to cloud computing and IoT, organizations looking for consistent performance know they can count on Kingston to deliver.

- Enterprise SSDs
- Server DRAM

Data security

Data protection is a must for businesses today with cyberthreats continually growing in number and sophistication. That's why Kingston has built in advanced security features into our encrypted solid-state drives (SSD), self-encrypting drives (SED) and encrypted USB flash drives. Inside and outside the firewall, our data security solutions provide an important layer of protection against costly data breaches—helping to mitigate risks while complementing a company's existing or developing security plan.

- Encrypted USB
- Self-encrypting SSD
- Server memory

System builders

Kingston offers a full line of SSDs in a variety of form factors and capacities for use with SDD PCs and computer appliances and a variety of applications— home theater systems, digital signage, desktop computing and anywhere space is limited.

- Design-In SSD
- Desktop and laptop memory
- M.2 SATA SSD
- mSATA SSD
- PCIe NVMe SSD

Embedded solutions

Built for reliability and endurance, our embedded memory products are designed for a variety of embedded applications, most notably for industrial-level electronic manufacturing.

- Embedded flash (eMMC)
- DRAM components

PC performance

When you're looking to improve the speed and performance of a laptop, desktop or workstation, Kingston is the name to count on.

- Memory
- SSDs

More than quality products, resources to drive your business forward

All Kingston products are backed by the support of a company with a 30+ year track record of product reliability and a commitment to our channel partners.

- Hassle-free return policy
- Product configurator with the industry's most extensive database of memory products
- Dedicated sales team
- Special aggressive pricing to help you close more deals
- 24/7 tech support
- Rigorous product testing

Throughout the sales cycle, Kingston makes sure you have the resources and support you need to keep your customers happy—and your business moving forward.

Kingston is everywhere.
