# We're proud to show you what we're made of.

#### Recovery, repair, and recycling programs

Lenovo Asset Recovery Services help maximize the recovery and reutilization of resources by treating used assets as a source of value and not waste. By FY 2025/26, our goal is to make 84% of repairs at the customer site without having to send the PC to a service center, with at least 76% of repairable parts repaired for future use.<sup>1</sup>

#### **Recycled content**

Nearly 250 of our products, like the ThinkPad® X1 Fold, powered by Intel vPro®, An Intel® Evo™ Design, contain materials sourced from recycled end-of-life IT and electronics equipment. In 2021, we used 17 million pounds of recycled plastic in our products. In addition to ocean-bound plastics, we recently incorporated recycled aluminum and magnesium into some of our products.

#### By FY 2025/26<sup>2</sup>

**100%** of our PC products will contain post-consumer recycled content.\*

**76%** of PC parts returned to our service center will be repaired for future use.\*\*

We will have enabled the recycling and reuse of

## 800 million

pounds of end-of-life products.\*\*\*

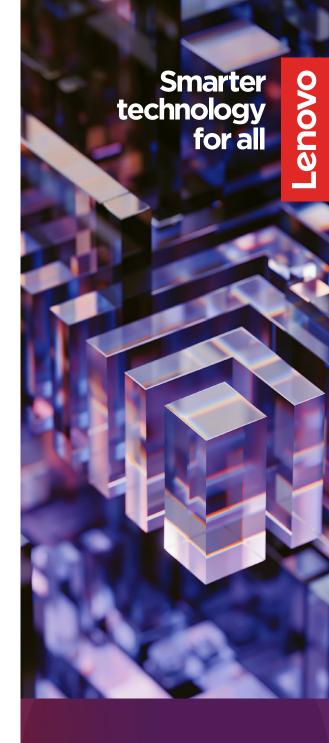

### Sustainable components and accessories

We are proud to partner with suppliers who share our sustainability vision. Intel,® ranked *Barron's* #1 Most Sustainable Company in 2022, treats and returns 99% of the water it uses in manufacturing.<sup>2</sup>

At Lenovo, we're focused on providing smarter technology that builds a brighter, more sustainable future for our customers, colleagues, communities, and the planet.
