

Networking that scales with your business

Legacy network patchworks and unpredictable cost create risk and complexity for customers.

Meter delivers reliable, secure enterprise networking, backed by CDW's industry expertise.

Operational demands are outpacing legacy networks

CDW and Meter are focused on delivering guaranteed business outcomes, not just hardware and software.

Meter co-manages your wired, wireless, and cellular LAN network, delivering connectivity across warehouses and data centers, retail, school campuses, and more.

Enterprise networks, built from the ground up

Everything we offer is engineered starting from what our customers critically need: predictability, resilience, and visibility in distributed environments and for business-critical operations.

Meter Network

A unified network stack to deploy and scale thousands of networks.

Meter Cellular

Reliable cell coverage with 3x faster install time than leading solutions.

Meter Command

A generative AI offering that automates network design, configuration, issue resolution, and support.

Meter Connect

ISP procurement in a few clicks: quotes are sourced to fit performance, budget, and timeline.

Accountable

With one platform, one support model, and one partner, your teams can focus on high-leverage work, not configuration and compatibility issues.

- ✓ Fewer vendors, less coordination costs
- ✓ Clear support escalation

Performant

A single stack designed to quickly scale from 1 to 1,000 sites: giving you the control and insight to optimize performance.

- ✓ Faster deployment
- ✓ Lower MTTR
- ✓ Consistent at scale

Predictable

Everything is delivered as a service to our customers and partners for a predictable monthly cost, with lifetime hardware upgrades.

- ✓ Lower operational burden
- ✓ Lower unexpected costs
- ✓ Higher margins

Meter established reliable Wi-Fi and Cellular connectivity within weeks, keeping our teams connected and producing engaging content.
