

Reliable cell service deployed as easily as Wi-Fi

Meter Cellular delivers consistent, full coverage indoor connectivity from all major carriers, without the complexity of DAS— all for one predictable monthly cost.

6x

Faster Day 0 and Day 1 than leading DAS solutions

3x

Cheaper install, management, and support than leading DAS solutions

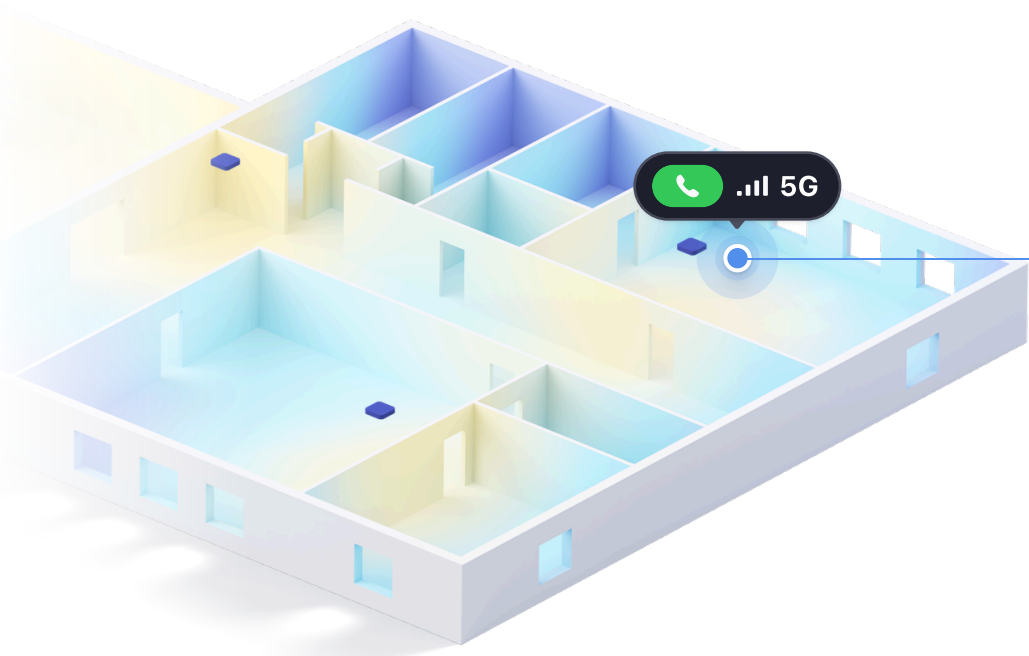

0x

Zero coordination and project management required by customers

Meter Cellular provides **seamless, full-coverage connectivity**

Built on neutral-host technology, users connect just like they would to a local carrier tower. No apps, no carrier profiles, no captive portals—just reliable, high-quality service.

Reliable coverage

Seamless roaming

No additional configuration

Supports all mobile phones and IoT devices in the last 15 years.

Deployment and maintenance

Meter installs the hardware, deploys cellular access points, and takes care of lifecycle maintenance.

Cellular support

Service troubleshooting, expert support, and 24/7 operations throughout all your spaces.

Cellular reliability

Redundant design and cloud-based configuration for all devices.

Cellular monitoring

Proactive alerting and continuous monitoring for hardware, software, and management.

  **Get cellular coverage at Wi-Fi cost**
No more thick coaxial cables or massive rooms of equipment. With Meter, all it takes is a single ethernet cable to install Cellular Access Points and instantly extend coverage through our standard network stack.

  **Scale and future-proof your spaces**
Whether you need coverage for a 1M sqft warehouse or thousands of retail locations, Cellular scales with you.

Combining the best of all solutions

Meter Cellular offers a hybrid solution that combines the best of all cellular solutions on the market today.

	Meter Cellular	Active DAS	Passive DAS
Installation	<input checked="" type="checkbox"/> CAT6 wiring	New coaxial wiring + dedicated equipment room with cooling	New coaxial wiring + roof access two
Timeline	<input checked="" type="checkbox"/> 8-12 weeks	9+ Months	2-6 Months
Coordination	<input checked="" type="checkbox"/> None	Extremely high	Medium
Capacity	<input checked="" type="checkbox"/> Medium/High	High	Dependent on local cell tower
Backhaul	<input checked="" type="checkbox"/> Existing ISP	Dedicated fiber from cell carriers	None
Price	<input checked="" type="checkbox"/> Affordable monthly cost	\$1.25m+ for 500,000 sq.ft	\$50,000+ for midsize space + maintenance fees

Meter's installation process

Meter has a world-class deployment team with unmatched project management and technical expertise.
