

CDW Microsoft Fabric Architect-as-a-Service

Delivery Duration: 80 hours (2 weeks)

OFFERING OVERVIEW

CDW's Microsoft Fabric Architect-as-a-Service (AaaS) provides expert guidance and strategic support for data management, architecture, and infrastructure around Fabric initiatives. Gain access to experienced architects who bring broad technical knowledge to the table.

Our consultants specialize in evaluating and optimizing data infrastructure to seamlessly integrate with Microsoft Fabric. By identifying gaps, improving data governance, and aligning your architecture, we ensure you're prepared to harness the platform's powerful capabilities.

Partnering with CDW gives you on-demand access to skilled professionals with the specific expertise required to accelerate project timelines and maximize results.
