CDW Microsoft Fabric Readiness Assessment

Delivery Duration: 2-3 Weeks

OFFERING OVERVIEW

CDW's Microsoft Fabric Readiness Assessment is designed to assist your organization with a detailed evaluation of your existing data ecosystem. The main objective is to provide organizations with a high-level review, along with documentation and recommendations for their fabric implementation journey.

This service examines your current data ecosystem and provides plans to deploy Microsoft Fabric and migrate your data into a robust and efficient fabric data estate.

The engagement is an essential first step to ensure a smooth and successful implementation, helping your business minimize risks and disruptions while maximizing the value of your Microsoft Fabric investment.

BENEFITS

Opportunity Identification | Cost Optimization | Tailored Strategies | Informed Decisions

- **Opportunity Identification**: Improve and innovate your data ecosystem, with data management practices for an optimized fabric data estate

- **Cost Optimization:** Evaluate current data product licensing migration and costs to optimize spend

- **Tailored Strategies**: Strategically align your business objectives to fabric implementation best practices with customized recommendations

- **Informed Decisions**: Empower stakeholders to make informed choices about technology investments and strategy with an understanding of your needs for the Fabric platform

WHAT'S INCLUDED

Use Case Identification → Current State Evaluation → Architecture Evaluation → Technology Evaluation → Licensing Cost Evaluation → Guidance & Roadmap
