

Safeguarding your security defense is critical to your organization.

Microsoft security services

Microsoft offers robust, full-stack security solutions to protect workers, devices and data — wherever they reside. CDW experts are the glue that orchestrates and connects these solutions together so that organizations can focus on what matters most to them. CDW's tailor-fit services include assessments, pilots, full deployments and even ongoing, managed services — CDW has you covered.

CDW's Microsoft security services can help you achieve:

Operational Efficiencies

Reliability

Reduced Risk

Finding the Right Solution

Regardless of whether you are operating a hybrid or multi-cloud environment, security should be the cornerstone of your cloud strategy. Tool integration, poor configuration and access issues often leave cloud environments vulnerable. Building security measures into your environment is critical but often requires specialized expertise.

We offer several Microsoft security services that can help keep your digital environment protected, including:

Microsoft Azure

- Azure Cloud Security Essentials Offering (ACSEO)
- Azure Cloud Security Program
- Governance for Azure

Modern Work

- Microsoft 365 Security Assessment
- Implementation of Defender services
- CDW Managed Service for Defender XDR and Sentinel

CDW + MICROSOFT

At CDW, our partnership with Microsoft extends far beyond mere certification. When it comes to implementing Microsoft security solutions, our customers can trust in our exceptional expertise and commitment to delivering unmatched value. Here's why you should believe in CDW as your trusted partner:

- **Strategic Alignment:** CDW has a long-standing, strategic partnership with Microsoft, allowing us unique insights into their security offerings.
- **Deep Technical Expertise:** Our team of Microsoft-certified experts possesses in-depth knowledge and hands-on experience, ensuring the effective implementation of Defender solutions.
- **Proven Track Record:** CDW has a stellar track record of successful Microsoft 365 Defender Security implementations, safeguarding organizations against evolving threats.
- **Customized Solutions:** We tailor our services to your unique needs, maximizing the benefits of Microsoft's security solutions.
- **Comprehensive Support:** CDW offers end-to-end support ensuring your security is always up-to-date.

CDW's partnership with Microsoft empowers us to deliver unparalleled value in securing your digital environment.

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

Cloud-Based

Services Overview

The following engagements are available as part of CDW’s portfolio of Microsoft security services:

Services
Microsoft Azure
<p>Azure Cloud Security Essentials Offering (ACSEO): This offering effectively demonstrates the value of Azure’s native security services, which are often undervalued due to complexity. As part of the engagement, we deliver the Azure Security Essentials Live Demo, which is an interactive program that helps you learn about the features and functions of Azure security services and solutions in a live environment. You’ll conduct live war game demonstrations, showing examples of typical security challenges like ransomware attacks, data breaches, insider threats and phishing campaigns using Azure security solutions to mitigate them.</p>
<p>Azure Cloud Security Program: This offering leverages the full spectrum of Microsoft Azure’s security tools and best practices to protect your data, network, applications and infrastructure. It will help you optimize your digital defenses with robust solutions designed to safeguard against emerging risks while ensuring compliance with industry standards. As part of the program, you will receive a Microsoft Cloud Security tools overview, which is a holistic review of Microsoft’s Modern Cloud Security toolset in a CDW demo environment. You will also receive a comprehensive security assessment, which provides in-depth analysis of your current security posture, identification of vulnerabilities and potential threats, and customized recommendations for improvement and integration with your existing security tooling. Finally, we offer security services implementation, during which CDW engineers will configure, deploy and integrate your custom security recommendations.</p>
<p>Governance for Azure: Based upon the Microsoft Cloud Adoption Framework, our Governance workshops will address cloud strategy and may include up to five disciplines: cost management, security baseline, resource consistency, identity and deployment acceleration. Governance is an iterative process and constantly needs to adapt based on technology and business changes. It is normal to start with one discipline and add other disciplines later.</p>
Modern Work
<p>Microsoft 365 Security Assessment: Microsoft has a great deal of security solutions out of the box, but is there more than you can utilize? With this assessment, CDW experts will perform thorough evaluations of the existing environment and then share both actionable insights and comprehensive recommendations to bolster your security posture.</p>
<p>Implementation of Defender services: Microsoft security solutions are only at their best when implemented correctly. CDW can help throughout the process, including initial planning, pilots, staged/full deployments and end-user enablement.</p>
<p>CDW Managed Service for Defender XDR and Sentinel: When Microsoft’s security solutions are already implemented, CDW’s managed services (SOC 2 & 27001 certified) can provide customers with an additional layer of protection. CDW offers 24x7x365 analyst-led incident detection and management, incident investigation, response and change/configuration management.</p>

Certifications

CDW is a Microsoft Solutions Partner and has earned the following recognition:

Microsoft Partner

Azure Expert MSP

Microsoft Solutions Partner
