

Amazing happens when people use AI to solve business problems.

Generative AI Solutions with Microsoft Copilot Studio

We can help you drive faster innovation within your business by unlocking your data within the Microsoft 365 ecosystem. Artificial Intelligence has sparked new conversations around the art of the possible within your business. Your team's imagination is fired up and ready to go, but how to achieve the vision you've set for new efficiency and productivity? Through the low-code solution development capabilities provided by Microsoft Copilot Studio and Microsoft Power Platform, empower your power users with the ability to solve problems on their own.

We can help your organization achieve:

Agility

**Faster
Innovation**

**Increased
Performance**

Begin Your Journey with Microsoft Copilot Studio

If you're ready to start building a Copilot solution with a vision in mind, our experienced team is ready to help your team make it a reality! Our team has worked with customers to realize their vision with Microsoft 365 since day one. Our expertise with Microsoft Copilot Studio and Power Platform can offer a boost to your citizen and professional developers alike.

We work interactively with your organization to provide:

Actions	Deliverables
Translate your vision for Copilot AI solutions into requirements and a plan for action.	✓
Build an MVP for a chatbot with Retrieval Augmented Generation (RAG) using Copilot Studio. We can also help you extend your MVP into full solutions.	✓
Unlock new productivity from your Microsoft 365 data and extend it with other systems such as ServiceNow or Salesforce.	✓
Leverage our expertise with Microsoft 365 to properly secure, manage and govern your Copilot solution.	✓
We'll work interactively with your team throughout the development process, ensuring you can carry the solution benefits forward into the future.	✓

CDW's full lifecycle of Services can support your organization no matter where you are on your journey
