WE GET SECURING YOUR ENVIRONMENT ALLOWS YOU TO STAY FOCUSED ON YOUR BUSINESS.

CDW Amplified™ Endpoint
Implementation of Microsoft Defender for Office 365

In today’s digital landscape, organizations face increasing cybersecurity threats, particularly within their Office 365 environment. The implementation of Microsoft Defender for Office 365 addresses this challenge by providing robust security measures to safeguard against advanced threats, phishing attacks and data breaches. With this service, you can expect enhanced protection, improved threat detection and peace of mind, enabling your organization to focus on your core business without compromising security.

Implementation of Microsoft Defender for Office 365 can help you achieve:

- **Operational Efficiencies**
- **Reliability**
- **Reduced Risk**

**Orchestrating the Right Solution**

Our Implementation of Microsoft Defender for Office 365 service encompasses a comprehensive set of offerings designed to deliver a secure and efficient environment within your Office 365 infrastructure. With CDW as your trusted partner, you can expect the following main characteristics, advantages and benefits:

**Service Inclusions:**
- **Thorough assessment:** We conduct a detailed analysis of your current Office 365 environment, identifying vulnerabilities and potential risks.
- **Customized solution design:** Based on your specific requirements and security objectives, we architect a tailored Microsoft Defender implementation plan.
- **Seamless deployment:** Our certified experts seamlessly integrate Microsoft Defender into your existing infrastructure, ensuring minimal disruption to your operations.
- **Configuration and optimization:** We fine-tune Microsoft Defender’s settings and policies to maximize its effectiveness and align with your security policies.
- **User knowledge transfer and adoption:** We provide comprehensive user knowledge transfer sessions to ensure your employees understand the new security features and best practices.

**Advantages and Benefits:**
- **Advanced threat protection:** Microsoft Defender for Office 365 offers cutting-edge security features, including anti-malware protection, email encryption and real-time threat intelligence, ensuring comprehensive protection against evolving threats.
- **Enhanced email security:** With robust phishing protection, anti-spam measures and URL filtering capabilities, your organization’s email communication is shielded from malicious attacks.
- **Data loss prevention:** Microsoft Defender helps prevent accidental or intentional data leaks by implementing data loss prevention policies, safeguarding sensitive information.
- **Streamlined incident response:** Rapid detection and response capabilities enable proactive identification of security incidents, minimizing the impact of potential breaches.
- **Scalability and flexibility:** Whether you have a small business or a large enterprise, our service is designed to scale and adapt to your organization’s evolving needs.

**CDW GETS MICROSOFT**

When it comes to implementing Microsoft Defender for Office 365, CDW is the trusted partner you need to ensure a successful and effective deployment. Here’s why you should believe in our expertise and our strong relationship with Microsoft:

- **Proven track record:** CDW has a long-standing partnership with Microsoft, backed by years of experience in delivering successful implementations and solutions across various industries.
- **Strategic collaboration:** CDW’s close working relationship with Microsoft also allows us to have direct access to their resources, support and insights. This collaboration enables us to align our solutions with Microsoft’s vision and deliver innovative and tailored implementations.
- **Deep technical expertise:** Our team of highly skilled professionals possesses in-depth knowledge of Microsoft technologies, including Office 365 and Microsoft Defender. We stay updated with the latest industry trends and best practices to provide you with cutting-edge solutions.
- **End-to-end solutions:** CDW offers a comprehensive suite of services, from consultation and design to deployment and ongoing support. Our holistic approach ensures a seamless experience and maximizes the value you can achieve from your investment in Microsoft Defender for Office 365.

Partnering with CDW gives you the confidence that you’re working with a reputable and experienced provider that understands the intricacies of implementing Microsoft Defender for Office 365. With our expertise and close partnership with Microsoft, we are committed to delivering the best possible outcomes for your organization’s security needs.

CUSTOMER SUCCESS STORY

Organization: Enterprise corporation

Employees: 15,000+

CHALLENGE: The customer, a medium-sized enterprise, faced significant cybersecurity challenges within their Office 365 environment. They struggled with frequent phishing attacks, data breaches and malware infiltrations, leading to potential financial losses, reputational damage and compromised sensitive information.

SOLUTION: CDW implemented Microsoft Defender for Office 365, providing the customer with a robust security solution. The implementation included advanced threat protection, data loss prevention measures and streamlined security management, all tailored to their specific needs.

RESULT: With the implementation of Microsoft Defender for Office 365, the customer experienced a remarkable transformation in their cybersecurity posture. They witnessed a significant reduction in successful phishing attacks and malware incidents, leading to enhanced data protection and improved overall security. The organization gained peace of mind by knowing that their Office 365 environment was safeguarded against evolving threats, enabling them to focus on their core business with confidence.
