Orchestrating the Right Solution

Some of the products and tools covered in a Microsoft 365 Security Identity Protection engagement include:

- Current Security Controls
- Azure Sentinel
- Cloud App Security
- Microsoft Entra ID P1/P2
- Microsoft Defender for Identity
- Microsoft Entra ID Identity Protection
- Identity Governance

Microsoft 365 Security Identity Protection allows you to successfully deploy a complete solution. With assistance from CDW, you will be able to do the following:

- Perform a deep dive into Microsoft 365 and features that could improve security of accounts
- Evaluate current environment and security requirements
- Plan and design an Identity Protection solution to support a production-ready deployment
- Gather business and technical requirements to ensure a successful project
- Install and configure Microsoft Entra ID P1/P2, Cloud App Security, Microsoft Defender for Identity and more if needed
- Configure the identity components to integrate with your existing environment
- Complete a knowledge transfer on proper administration and configuration of Identity Protection
- Develop a roadmap plan on adoption of security features of Microsoft 365

CDW gets Microsoft

CDW is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team providing the support you need, when and where you need it.

We can help you navigate Microsoft’s robust array of solutions. CDW is an end-to-end provider of cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your business demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer outstanding providers, risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.

We get Microsoft. And we can share our knowledge with you, so your organization can spend less time managing software and more time putting it to work.
