

Your Path to Microsoft Fabric

CDW's Planning Workshop for Microsoft Fabric

Turn Data into Direction

CDW's Microsoft Fabric Planning Workshop helps you move from complexity to clarity, with a plan you can act on. In just a few weeks, we work side by side with your team to uncover what matters most:

- Where your data can drive real business impact
- How mature your governance is today and where it needs to be
- Which use cases will deliver the fastest value

Together, we design a Fabric environment built around you, bringing your data into one place, simplifying how it is managed, and setting the foundation for scalable growth. The result?

A clear, confident path forward. You will walk away with:

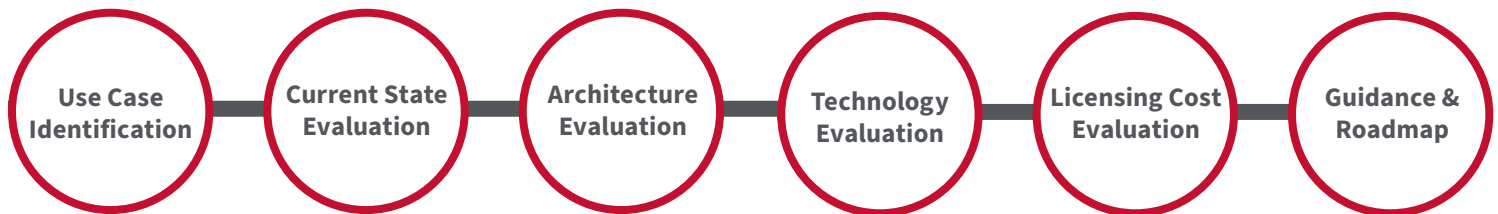

- A tailored Fabric architecture
- A practical roadmap for adoption
- Guidance to deploy, govern, and scale with confidence

No guesswork. No wasted time.

Just a modern analytics strategy built to move your business forward.

Delivery Duration: 2-3 weeks
