

WE GET THE NEED TO BE MORE RESPONSIVE TO CHANGE.

CDW Amplified™ Hybrid Cloud Migration Services for Azure

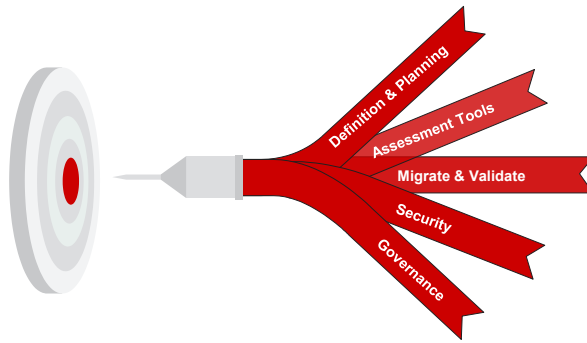

Today, more than ever, businesses need the ability to adapt quickly and at scale. Organizations are realizing that moving all or a part of their business to the cloud allows them to be agile and pivot as business needs change. Yet, organizations are finding it harder to plan and implement complex cloud technology. CDW can help you strategize, assess, adopt and integrate securely and seamlessly to the cloud.

Migration Services for Azure can help you achieve:

-  **Operational Efficiencies**
-  **Agility**
-  **Faster Innovation**

Orchestrating the Right Solution

Migrating to Azure is simple when you have a strategy. CDW will help your team to create this strategy, consisting of the following main areas: assessment, plan, migration, optimization, and security and governance.

As part of the Migration Service, CDW works with your team to deploy an assessment tool in your environment and then reviews the results with you. The results will help your organization understand the costs of moving your on-premises workloads to Azure, as well as expected performance.

The Migration for Azure may include these elements:

- Knowledge transfer and best practices from CDW experts
- Assessment using industry-standard tools
- Migrate complex workloads, tenant-to-tenant, and/or applications
- Create landing zones
- Configure monitoring and performance tools

CDW GETS MICROSOFT AZURE

CDW is an end-to-end provider of cloud applications, solutions and services for public, private and hybrid cloud environments. We are uniquely qualified to design, deliver and manage a flexible solution tailored to your needs. CDW will help you adopt and integrate Azure securely and efficiently. We have a long-standing, award-winning relationship with Microsoft that we extend to our clients.

We get Azure.

CDW demonstrates Microsoft expertise through a variety of credentials:

- Microsoft Azure Expert MSP
- Gold Platform member of the Microsoft Partner Network
- Backed by Microsoft's highest tier of support
- CSP provider for Microsoft Azure

CDW's full lifecycle of Services can support your business no matter where you are on your journey

Services Overview

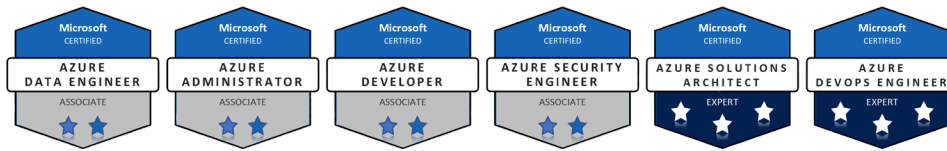

The following are included with **Migration for Azure**:

Service	Included
Conduct business objective meeting	✓
Implement an assessment tool in your environment	✓
Conduct business impact meeting reviewing findings, configurations, timelines and costs	✓
Work with your organization to relay application changes necessary for migration and supporting your testing efforts prior to migration	✓
Execute Migration strategy	✓
Validate successful migrations	✓
Provide documentation of strategies and plans	✓

Certifications

CDW has earned the following certifications:

- Linux on Azure
- Azure Administrator Associate
- Azure Solutions Architect Expert
- Azure Developer Associate
- Azure DevOps Engineer Expert
- Azure Data Engineer Associate
- Azure Security Engineer Associate
- Microsoft Azure Administrator Associate
- Microsoft Azure Solutions Architect Expert

CLIENT SUCCESS STORY

Organization: Healthcare system

Size: Two hospitals, a network of more than 300 physicians and multiple outpatient care facilities

CHALLENGE: A leading integrated healthcare delivery system was looking to increase productivity by moving on-premises workloads into Azure.

SOLUTION: Our CDW experts worked closely with this organization to design and perform a Migration Workshop using Microsoft Azure. The planning and design phase consisted of interactive meetings with key members of the organization. These discussions focused on the client's current environment as well as defining the business and technical requirements for the future. This engagement included both Azure and a third-party assessment tool, to ensure an accurate account of Azure costs and expected performance, allowing this client to intelligently move forward with an Azure migration.

RESULT: CDW migrated six virtual machines to Microsoft Azure. The healthcare provider reported that leveraging Microsoft Azure has significantly lowered their ongoing operational costs. CDW's knowledge transfer of the migration tools and processes has enabled this healthcare provider and its medical staff a better understanding of how and when to move on-premises workloads to Azure. The client is planning to migrate future virtual machines at their own pace.
