Migrate to Azure from Microsoft SQL

Leverage CDW's deep SQL expertise for advisory and consulting services to accelerate your SQL initiatives while minimizing risk - or to manage your SQL environment entirely.

CDW has a team dedicated to the Microsoft SQL platform, inclusive of SQL Server and Azure SQL. Our SQL engineers and consultants are principal and senior-level experts who have assisted clients of every size and segment to assess, architect, plan, and implement migrations to Azure.

Our team can help you achieve:

1 Azure Landing Zone

2 SQL Assessment, Planning & Design

3 SQL Migration

Finding the Right Solution

At CDW, our approach is founded on a partnership that prioritizes understanding and aligning with our clients' unique requirements. We are committed to delivering solutions that are customized to each client's specifications, considering factors such as budget, application necessities, performance expectations, business criticality, existing infrastructure, and the skillsets and capabilities of their teams. This holistic and consultative strategy ensures that the solutions we provide are not only effective but also seamlessly integrated into our clients' operational frameworks, enhancing efficiency, scalability, and technological advancement.

Why CDW

As one of the premier IT solutions providers, CDW boasts a comprehensive portfolio of services unmatched in depth. Unlike our competitors, who may need to re-purpose their teams' ancillary skills, CDW prides itself on housing specialized teams devoted entirely to their fields of expertise. This specialization ensures that our clients receive not just service, but mastery, guaranteeing the implementation of best-in-class solutions. Our dedication to excellence and precision in every project underscores CDW's commitment to not only meet but exceed client expectations, providing tailored, cutting-edge solutions that drive efficiency, innovation, and competitive advantage.

Assess
CDW experts will help you evaluate your current environment, along with health checks, IT consulting and other data mitigation assessments.

Design
CDW will help you find the technologies that work best for your organization and the goals you set out to achieve.

Deploy
From hardware, racks and servers to data migration, asset tagging and tracking, CDW will be there to ensure your deployment runs smoothly.

Manage
Monitoring, maintenance, reporting and incident management are crucial to a healthy data center. CDW's managed services team is there to help.

CDW

Why AZURE SQL?

Azure SQL is the objective leader for accommodating SQL Server in the cloud. This compelling cloud-based alternative to hosting SQL Server on premise offers the most integrations, compatibility with existing SQL Server deployments, design flexibility, and cost savings.

CDW's Azure and SQL services capabilities can accelerate your journey to Azure and/or Azure SQL in less time, with less risk, and the peace of mind offered by our implementation of best practices and solution customized to your exact needs.

Business Priority	Solution
Minimize Cost	By leveraging CDW's comprehensive assessment, businesses can pinpoint inefficiencies within their current SQL deployments, enabling a more cost-effective transition to Azure. This strategic approach not only optimizes expenditure but also ensures that enterprises fully exploit Azure's scalable and flexible infrastructure. Through Azure's sophisticated management tools and intelligent performance insights, companies can continuously monitor and adjust their resources, ensuring that they only pay for what they need, when they need it. This dynamic scalability is key to maintaining operational efficiency and reducing overall expenses, making migrating to Azure an ideal choice for businesses aiming to minimize costs while enhancing their database capabilities.
Minimize Downtime	Utilizing the latest in high availability (HA) and disaster recovery (DR) technologies, Azure SQL offers robust solutions that guarantee continuous operation and data protection. This proactive approach not only preserves the integrity and availability of your data but also supports a seamless business continuity strategy. With CDW's expertise in Azure migrations, businesses can achieve an agile, resilient environment that supports growth and innovation while significantly minimizing downtime.
Maximize Data Value	By harnessing Azure SQL alongside Azure's sophisticated analytics and AI services, businesses can unlock new insights, improve decision-making, and innovate faster. The result is a powerful ecosystem where data is not just stored but actively works to drive business growth, optimize operations, and create personalized customer experiences. With Azure SQL, your data becomes a strategic asset ensuring that your organization stays ahead in a data-driven world
