CDW SERVICES:

MICROSOFT AZURE SECURITY WORKSHOP AND PILOT

CDW CAN OPTIMIZE YOUR AZURE ENVIRONMENT'S SECURITY POSTURE

The Microsoft Azure Security Workshop and Pilot helps organizations realize the power and scalability of Azure's built-in security features. Utilizing our popular Azure Governance solutions, combined with an emphasis in mapping to NIST and CIS controls, your organization can dramatically increase its security posture within Azure. Additionally, you will get a bird's-eye view across all Azure security data ingested and detect threats using Microsoft's analytics and threat intelligence called Azure Sentinel.

The engagement also will cover both product and solution best practices configuration recommendations. This will provide an evidence-based insight to ensure industry security, governance and compliance is uplifted into your Azure cloud solution. This will benefit organizations with an Azure Tenant or an Office 365 commercial subscription as well as Office 365 U.S. Government Community (GCC) clouds.

WHAT CAN CDW DO FOR ME?

Some of the products and components covered in the Microsoft Azure Security Workshop and Pilot include:

· Business and technical security landscape and requirements evaluation

· Analysis of cloud including:
    · Security posture
    · Device management
    · Content management
    · Information management

· Zero Trust approach to Azure cloud security

· Configuration of below components:
    · Azure Blueprints/Policy mapped to industry NIST/CIS controls
    · Azure Sentinel
        · Playbooks and Logic Apps for SOAR capabilities
        · Workbooks and analytics
    · Azure Security Center
    · Identity security and protection
    · Infrastructure and storage protection
    · Azure Firewall
    · Azure Defender for key services

THE BENEFITS

· Understand the features and benefits of Azure Security

· Realize a more secure Azure environment against any Cloud Security Posture Management (CSPM) tool scan

· Discover threats to your Azure environment subscription/environments across identity, compute, development and data

· Understand how to mitigate threats by showing how Azure security products can help mitigate and protect against threats that are found

· Create a defined deployment roadmap based on your environment and goals

· Develop joint plans and next steps for a security and compliance of any additional Azure services or components

WHY CDW?

CDW is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team providing the support you need, when and where you need it.

We can help you navigate Microsoft's robust array of solution offerings, including Azure. CDW is an end-to-end provider of cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your business demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer outstanding providers, risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.

We get Microsoft Azure. And we can share our knowledge with you, so your organization can spend less time managing software and more time putting it to work.
