

Planning Workshop for Microsoft Fabric

Delivery Duration: 2-3 Weeks

OFFERING OVERVIEW

CDW's Planning Workshop for Microsoft Fabric equips organizations with a clear, actionable blueprint for adopting Microsoft Fabric and modernizing their analytics estate. Through business impact sessions, technical discovery, and architectural analysis, CDW identifies high-value use cases, assesses data governance maturity, and designs an integrated Fabric environment covering ingestion, modeling, security, and lifecycle requirements.

Across 2–3 weeks of interactive planning, our experts guide your team in building a tailored Fabric architecture that unifies data sources, strengthens governance, enables streamlined data lifecycle management and supports long-term growth.

The final architecture and roadmap deliverable provides a clear, actionable blueprint—including environment design, governance frameworks, deployment sequencing, and next-step recommendations for successful Fabric adoption.

BENEFITS

- **Strategic Alignment:** Ensures the architecture is designed around your business goals, use cases, and desired outcomes.

- **Unified Architecture:** Provides a clear, scalable blueprint that consolidates data sources and supports long-term growth.

- **Data Governance:** Establishes minimum viable data governance and data quality practices that strengthen trust, compliance, and readiness for enterprise-scale analytics.

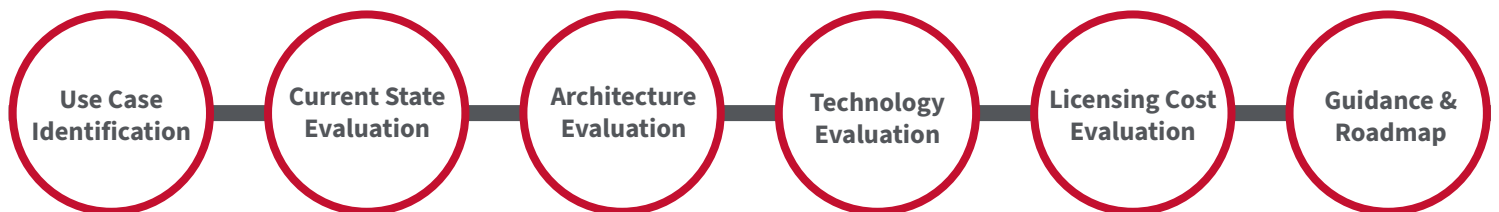

- **Strategic Roadmap:** Delivers a concrete, step-by-step plan to move forward with confidence.

- **Faster Time to Value:** Accelerates adoption through an actionable architecture and roadmap that reduces guesswork and shortens implementation cycles.
