WE GET THE NEED TO ENHANCE YOUR SECURITY PRESENCE TO KEEP YOUR ENVIRONMENT SAFE.

CDW Amplified™ Endpoint
Microsoft 365 Security Pilot

The security landscape has changed dramatically over the past three years, and many technologies are not prepared to deal with the variety of new threats. Automated malware detection and forensics often occur too late — after the breach — and it can take months before an organization notices it has been compromised. In response to these constantly evolving threats, Windows 10, EMS and Office 365 have introduced many innovative security features. These features harden identity, data and applications, infrastructure, and devices against advanced attacks, and help you respond more effectively to the targeted breaches when they happen. Windows 10, EMS and Office 365 ProPlus security bring a much needed unified and comprehensive solution for disrupting cyber attackers.

The Microsoft 365 Security Pilot provides a path to becoming a secure, modern enterprise through strategic investments in both digital transformation and security enhancements. Additionally, this engagement drives planning to upgrade corporate workstations and cloud services to the latest Windows operating systems and cloud services, Microsoft 365 Enterprise E5. The Microsoft 365 Security Pilot provides a better opportunity to evaluate the functionality, user experience and deployment of these features to prevent, detect and respond to cyber-attacks, protect intellectual property and maintain a competitive advantage in the marketplace.

A Microsoft 365 Security Pilot can help you achieve:

Operational Efficiencies   **Reliability**   **Reduced Risk**

Orchestrating the Right Solution

Some of the products and tools covered for Microsoft 365 include:

· Windows 10/11 Enterprise
· Office 365 Pro Plus
· Enterprise Mobility + Security
· Credential Guard
· Application Guard
· Microsoft Information Protection
· Microsoft Defender for Office 365
· Microsoft Defender for Identity
· Microsoft Defender for Cloud Apps
· Conditional Access

CDW helps you enhance your security environment with the Microsoft 365 Security Pilot and successfully deploy a complete solution, which provides the following benefits:

· Gain better understanding of Windows 10/11, Office 365 and EMS Security features
· Evaluate current environment and security requirements
· Acquire knowledge transfer on best practices to deploy and configure features with optional deployment testing, leveraging various tools
· Administer Windows 10/11, leveraging built-in manageability features
· Deploy and manage security and administration tools
· Quickly adopt advanced security features in Microsoft 365
· Manage a mobile workforce using Azure Active Directory
· Develop a roadmap for an enterprise-wide Windows 10/11 deployment

CDW GETS MICROSOFT

CDW is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team providing the support you need, when and where you need it.

We can help you navigate Microsoft's robust array of solutions. CDW is an end-to-end provider of cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your organizational demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer outstanding providers, risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.

We get Microsoft. And we can share our knowledge with you, so your organization can spend less time managing software and more time putting it to work.

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

Design → Orchestrate → Manage   On-Premises → On-Journey → Cloud-Based
