

Enhance learning experiences by using Windows 11 student devices.

## Top 5 Intune for Education Features

### Simplify Management

Simplify the set-up and management of devices for students and teachers with Intune for Education. In just a few steps, you can quickly deploy apps to users and apply device settings that create an enriching classroom experience.

### Faster Deployment

Manage an entire fleet with Intune for Education, including the ability to deploy software and push security policies using a single configuration. Cut deployment time from months down to weeks.

### Student Apps

Intune for Education offers age-appropriate apps that can be installed on student devices remotely, including apps such as Minecraft Education, Microsoft PowerPoint, and Clipchamp.

### Save Time

Microsoft's Intune for Education can help reduce student device configuration by 84%. This saves IT personnel 2.5 hours per device.

### Complete Solutions

With Microsoft's Cloud Management Solutions—comprised of Intune for Education, School Data Sync, Autopilot, and the Set up School PCs app—IT personnel can set up a classroom in under an hour and easily manage devices, users, and apps.
