Free flowing data pipeline
Run 5 times more data through your pipeline from edge to core to cloud with more efficient data collection, accelerated AI workloads, and smoother cloud integration.

Intelligence-driven speed
Get more than 2GBps of sustained throughput (5GBps peak) with well under 1ms of latency, while the GPUs operate at over 95% utilization and create different tiers of data service.

Fast, efficient dataset copies
Copies are better across the board – completed in minutes instead of hours or days, and stored efficiently, with up to a 90% reduction in storage space.

Hit the ground running
Configure your AI infrastructure with Ansible integration in about 20 minutes.

Hit the ground running
