

WE GET COMPLETE VISIBILITY.

To monitor everything under a single interface, you need NetApp Cloud Insights and IT Orchestration by CDW®.

NetApp® Cloud Insights gives you complete visibility into your infrastructure and applications. With Cloud Insights, you can monitor, troubleshoot and optimize all your resources and applications across your entire technology stack, regardless of what brand you are running it on and whether it's on-premises or in the cloud.

With Cloud Insights you can:

- Find and fix problems faster.
- Detect and protect against ransomware before it impacts your business.
- Meet SLOs and SLAs during and after your move to cloud.
- Manage resources more effectively to do more with less.

PROTECT	DETECT	RECOVER
Infrastructure monitoring (Cloud Insights)		
<ul style="list-style-type: none"> • Initiate NetApp® Snapshot™ recovery point. • Block accounts from accessing data. 	<ul style="list-style-type: none"> • Monitor user file access patterns. • Detect and alert on user and storage anomalies. 	<ul style="list-style-type: none"> • Review file audit logs for forensics and to identify which files to restore.

Secure your data with Cloud Secure:

- Protect your most valuable business asset – data – from ransomware with early detection and automated responses to threats.
- Get alerts on potential misuse or theft of key intellectual property by malicious parties, both internal and external to your organization.
- Help safeguard corporate compliance by auditing access and usage patterns to your critical corporate data, on-premises or in the cloud.
- Reduce mean time to resolution by as much as 90%.
- Stop log hunting for days and failing to manually correlate infrastructure. Use NetApp's dynamic topology and correlation analysis to pinpoint the problem area immediately.
- Reduce cloud infrastructure costs by an average of 33%.
- Remove inefficiencies by identifying abandoned and unused resources and right-size workloads to their optimized performance and cost tiers.
- Diagnose and prevent up to 80% of cloud issues from impacting end users.
- Stop searching through vast amounts of data to find the relevant piece. Use advanced analytics and machine learning to identify issues before they become critical outages.

Hybrid Cloud Visibility

From the public cloud to the data center, full-stack visibility of infrastructure and applications from hundreds of collectors is available, all in one place.

You don't need to scramble to find new monitoring tools every time a new platform is introduced into your organization. Comprehensive support for on- and off-premises devices, paired with an API for ingestion from open collectors like Telegraf, as well as custom metrics means that wherever your strategy takes you, Cloud Insights has your back.

SOLVE PROBLEMS WITH CLOUD INSIGHTS

1. Tell me where I have a problem.

2. Direct me to it.

3. Help me solve it.
