

# Endpoint Management

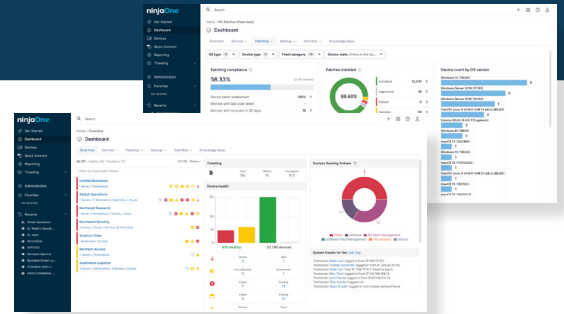

ninjaOne®

## Manage, patch, and support all your endpoints

Cloud-native NinjaOne Endpoint Management enables IT organizations to manage, patch and support all of their endpoints from a single console. NinjaOne's agent-based approach enables complete management of any internet-connected device so you can easily and securely support remote and hybrid employees. Enjoy 90% faster patching, cut time spent on software deployment and device setup in half, and equip front-line staff with one-click remediations to solve even complex tasks.

### KEY FEATURES

- **Unify device management**  
Monitor, support, and control all your Windows, Mac, and Linux end-user devices, servers, virtual machines, and networking devices from a single easy-to-use interface.
- **Support any device anywhere**  
NinjaOne's agent-based approach enables complete management of any internet-connected device so you can easily and securely support remote and hybrid employees.
- **Endpoint task automation**  
Automate repetitive endpoint tasks (app installs, patching, device setup, maintenance) to standardize outcomes, free up technicians, and improve device stability.
- **Software Management**  
Create all-in-one software installation packages that can be built and executed on any number of devices. Inventory, install, or uninstall applications at the click of a button.
- **Form-based script deployment**  
Create scripts using common scripting languages and deploy them at scale. Quickly create interactive script deployment forms that allow technicians to customize scripts without touching code.
- **Quick deployment, low TCO**  
As a 100% cloud-based solution, NinjaOne is quick to setup, requires minimal ongoing maintenance, and avoids costly on-premises infrastructure resulting in fast time-to-value and low total cost of ownership.

## The NinjaOne Difference

### Fast to learn, simple to use.

The cloud-native NinjaOne platform is built from the ground up by our team, optimized for power and ease of use.

### #1-rated free support.

Our top-rated Support team is there when you need them, earning them an average 98% satisfaction rating year over year.

### Management of ALL your devices.

See, monitor, and manage Windows, macOS, Linux, SNMP, virtual, and cloud devices from one console.

### Unlimited, free on-boarding and training.

We'll help get you up and productive in days, not months, and training is always there for your team.

### Automation from day one.

Patch automation is part of every device setup and hundreds of out-of-box automation scripts are ready to use and save you time.

### Constant innovation.

Frequent releases that include features requested by our customers ensures NinjaOne continues to meet your needs.

### Fast navigation.

For IT admins, every second counts, so the NinjaOne platform is optimized for speed and efficiency.

### ENDPOINT MANAGEMENT

PATCH  
MANAGEMENT

SOFTWARE  
DEPLOYMENT

MONITORING  
& ALERTING

SCRIPTING &  
AUTOMATION

REMOTE ACCESS

BACKUP

TICKETING

NGAV / EDR

## What our customers are saying

"Everything we needed was bundled with NinjaOne, which made the decision to change management tools even more obvious to us. Instead of paying for individual software for backup, antivirus, and ransomware protection, we switched over to systems integrated with NinjaOne. So, getting our CFO to sign off on the investment was incredibly easy."

Paul Jebe, Vice President of Information Technology,  
Kinex Medical Company

"The most important outcome of our switch to NinjaOne, for me, is that our end-users are happier. We have a much better end-user support workflow, which has improved our mean time to resolution for tickets and significantly increased our support capabilities."

Brian Kindt, Director of IT,  
Cherry Republic

"It is remarkable. I've never worked with a tool that works as fast as NinjaOne."

Phil Mariscal, IT Director,  
California Truck Centers
