# NUTANIX

# 10 Ways to Easily Extend AI Anywhere

Nutanix accelerates your path to AI by enabling you to overcome common challenges such as infrastructure complexity, security, compliance, and lack of AI expertise.

See how Nutanix does it across multiple clouds, on-premises datacenters, and to the edge.
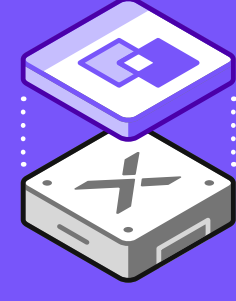

## 1

### Turnkey AI
Scale from pilot to production with less time and effort.

Nutanix offers a turnkey software-defined solution that integrates GenAI and AI/machine learning apps while keeping data and apps under your control.
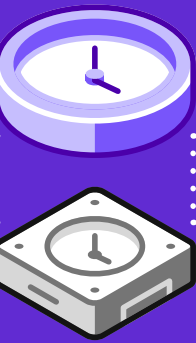

## 2

### The Same Platform
Deploy AI workloads across clouds, on-premises datacenters and edge.

Nutanix gives you a headstart on the path to AI at scale with a single control plane that simplifies and streamlines common infrastructure and AI workflows.

## 3

### Self-Service and Automation
Accelerate time to value without giving up control.

Nutanix eliminates the manual effort required to create and deploy AI models and manages the AI lifecycle, performs resource provisioning and ensures data protection.

## 4

### VMs and Containers
Run AI in VMs today and transition to containers anytime with minimal effort.

Nutanix supports VMs and containers on the same infrastructure to ensure that every AI implementation will run on Nutanix.

## 5

### Advanced Security
Enhance your AI strategy and your organization's security efforts.

Nutanix offers a single dashboard to manage and govern security for AI and other apps and reduces the need for specialized cybersecurity expertise.

## 6

### App-Aware Data Services
Deliver storage performance, reliability and control everywhere.

Nutanix software-defined data services simplify management without sacrificing speed, flexibility and security required for AI and other modern apps.

## 7

### Cloud Native Support
Configure and manage cloud native environments anywhere.

Nutanix enables you to create and deploy cloud native AI and modern apps that are scalable, agile and cost-effective so you can swiftly drive innovation.
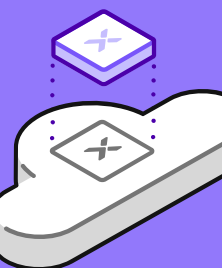

## 8

### Lower TCO
Understand, predict and control costs of your AI strategy.

Nutanix offers a unified architecture, native AHV hypervisor, full license mobility, and efficient cloud operation which provides a more cost-effective infrastructure.

## 9

### Leading Services and Support
Overcome organizational deficits and get your AI platform up and running.

Nutanix has maintained a **90+** Net Promoter Score (NPS) for the past five years, ranking among the highest in the technology industry for customer loyalty and satisfaction.

## 10

### Expansive Partner Ecosystem
Receive certified support for the tools you need to succeed.

Nutanix has strong partnerships with AI leaders in hardware, frameworks, operations, GenAI, and services so you can build a solution that fits your needs.

## Go the Distance
Nutanix effortlessly extends AI to wherever you want to go—on-premises, the cloud and the edge—while reducing complexity, strengthening security and lowering your TCO.
