

# Okta Identity Governance

A unified identity & access management (IAM) and governance solution, for a strong enterprise security posture that mitigates modern risks and improves efficiency.

**By 2023, 75% of security failures will result from inadequate management of identities, access, and privileges—up 50% from 2020.**

—Gartner

To meet today’s dynamic workforce initiatives, organizations are ramping up cloud platform adoption and accelerating digital transformation initiatives. In the process, the number of digital identities they must manage has increased dramatically, along with the complexity of managing them.

Identity governance is an important security risk and management discipline that directly affects an organization’s security posture, but traditional market solutions take a long time to deploy and are expensive to maintain. Without basic governance capabilities, organizations expose themselves to risks originating from inefficient administration of identities and access entitlements:

- Complex, manual audit processes
- Poor end-user experience
- Limited visibility into user access
- Inability to meet compliance needs

**Cloud-native identity governance that’s efficient, effective, and easy to use**

Okta Identity Governance brings identity governance into the Okta Identity Cloud to simplify access governance, take advantage of cloud efficiencies, and bring risk mitigation into the modern era.

Okta Identity Governance builds on proven Okta Lifecycle Management and Workflows products, extending access and entitlement administration to include key governance tools.

**Okta Identity Governance includes:**

**50%** of IGA deployments are in distress, failing to achieve functional, budgetary or timing commitments. —Gartner

## The Okta Identity Governance difference:

- **Support compliance by automating access policy enforcement.** Automate access certification campaigns and easily produce reports demonstrating compliance to auditors.
- **Improve employee productivity by simplifying self-service access requests.** Tight integration with common collaboration tools including Slack and Microsoft Teams means Okta Identity Governance helps you meet users where they are.
- **Gain visibility into user access patterns.** Okta’s unified identity and governance solution provides an unparalleled, comprehensive view of key attributes for each user, so administrators and reviewers can make informed decisions about access.
- **Deploy a governance solution quickly and easily.** Okta’s cloud-native governance solution—with its 7,000+ pre-built integrations—makes intelligent, easy-to-use identity governance a reality for any organization. Automate complex identity processes at scale and deploy a governance solution in weeks.

## Benefits of Okta Identity Governance

- **Simplify** access governance with a unified IAM and governance solution that provides an unparalleled comprehensive view of every user’s access patterns.
- **Secure** your enterprise by gaining visibility and control into who has access to which digital resources in your organization.
- **Improve** IT efficiency by automating access approvals, provisioning, and remediation to reduce cost and eliminate errors.
- **Integrate** with your best-of-breed solutions stack for intelligent, efficient, user-friendly identity governance that provides quick time-to-value. Orchestrate access governance to reduce management workload with automated tasks and process workflows.

## Okta Identity Governance

Strengthen your security posture. Address modern security risks. Improve efficiency.

### Access Request

- Modern Request/ Approvals
- Auto provisioning
- Audit Reporting

### Identity Lifecycle Management

- Directory Sync and HRaaM
- Identity Lifecycle
- Provisioning/ Deprovisioning

### Access Certification

- Access Certification
- Governance Policies
- Audit Reporting

### Workflows

- Extensibility
- Low Code/No Code Platform

### About Okta

Okta is the World’s Identity Company. As the leading independent Identity partner, we free everyone to safely use any technology—anywhere, on any device or app. The most trusted brands trust Okta to enable secure access, authentication, and automation. With flexibility and neutrality at the core of our Okta Workforce Identity and Customer Identity Clouds, business leaders and developers can focus on innovation and accelerate digital transformation, thanks to customizable solutions and more than 7,000 pre-built integrations. We’re building a world where Identity belongs to you. Learn more at [okta.com](https://okta.com).
