

# Omnissa Workspace ONE Mobile Threat Defense

Mobile threats are increasing, both in quantity and variety. Organizations face growing threats from phishing, rogue networks, malicious Wi-Fi hot spots, and millions of apps on corporate- and employee-owned devices. These threats expose organizations to data leakage, credential theft, and the exfiltration of private information that can be used to target organizations in advanced attacks.

## Overcome mobile security challenges

Omnissa Workspace ONE® Mobile Threat Defense makes it easy to deploy and manage mobile security for iOS, iPadOS, Android, and Chrome OS. Direct integration with the Workspace ONE platform allows for automated remediation and response.

## Address a wide range of advanced mobile threats

Workspace ONE Mobile Threat Defense offers protection from application-based threats, web and content vulnerabilities, zero-day threats and device vulnerabilities, phishing and malicious web content, machine-in-the-middle attacks, and more.

## Why choose Workspace ONE Mobile Threat Defense for endpoint security?

No separate apps or agents to deploy. Many security threats can be simply and effectively addressed with Omnissa Workspace ONE UEM via the unique integration in Omnissa Workspace ONE Intelligent Hub. Comprehensive phishing and content protection can coexist with secure app tunneling. Aggregate reporting and integrations with third-party solutions help keep teams informed and engaged.
