

**Your network
is everywhere.
Your security
should be, too.**

Managed Prisma SASE

Modern enterprise networks exist on a massive scale; resources and users can be anywhere at any time. Protecting your network can be complicated and expensive. Prisma provides robust security for your users, no matter where they are or where they're going. Managed Prisma SASE provides expert operation and management; ensuring that your users are secure, all while providing unmatched accessibility and cost savings.

Managed Prisma SASE can help you achieve:

**Operational
Efficiencies**

**Cost
Reduction**

**Reduced
Risk**

Finding the Right Solution

CDW's Managed Prisma SASE service is a comprehensive, robust and cost-effective solution designed to secure and streamline your network operations. Our service enhances your security posture, increases productivity and reduces operational costs by managing the service for you. With our deep understanding of network security and digital transformation, we're committed to delivering the best possible service and peace of mind. Some of the advantages of Prisma include:

- **Prisma Access:** This is a Secure Service Edge (SSE) platform that provides secure access for your users, no matter where they are.
- **SD-WAN:** A software-defined networking platform that revolutionizes your network connectivity. It optimizes traffic flow across your network, ensuring seamless access to resources and bolstering productivity.
- **CASB:** The next-generation Cloud Access Security Broker Add-On fortifies your cloud security posture. It provides granular visibility and control over cloud services, enabling secure usage and data protection.
- **ADEM:** The AI-powered digital experience monitoring tool that enhances user satisfaction by optimizing the digital experience across your network. It provides valuable insights into user experience, helping to identify and address issues proactively.
