

Uptime is Better Visibility to Critical Data.

ENTUITY SOFTWARE DATA SHEET

IN PARTNERSHIP WITH:

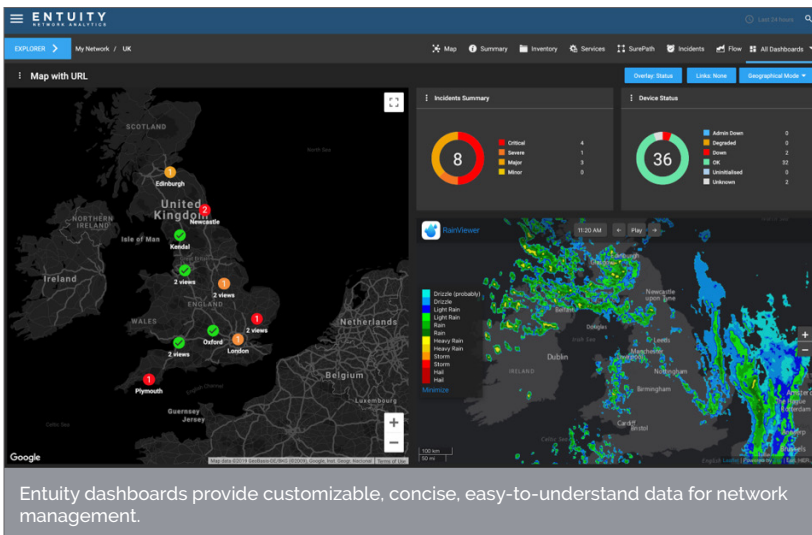

Entuity is a powerful, yet easy-to-use enterprise network analytics solution designed for IT organizations to maximize network performance and service availability.

Rapidly changing heterogeneous networks require faster insight and faster resolution. Entuity:

- Significantly reduces alert noise so you can focus on what is important
- Resolves issues quickly and gets to the root cause using real-time analytics
- Delivers proactive management with predictive trends
- Supports a multi-cloud strategy Entuity is easy to install, customize, operate and maintain, and lowers total cost of ownership to a fraction of other products.

PRODUCT HIGHLIGHTS

- Enterprise scalability. Scales easily, federated architecture for seamless expansion
- Supports multi-tenancy including overlapping IP addresses for management from the same server
- Provides industry's best custom dashboard builder to reflect how IT organizations manage their networks
- Always-on business services require always-connected management. 100% mobile enabled for management from laptops, smartphones and tablets
- Integrates with 3rd party vendors – BMC, Dell, ServiceNow, Oracle, Moogsoft, Splunk and more

Deliver Outstanding End-User Experiences

REDUCE MANAGEMENT COMPLEXITY — Entuity simplifies network performance monitoring so you can concentrate on delivering great end-user services.

ACHIEVE MORE UPTIME — Go from reactive to proactive. Keep your network functioning optimally before problems become issues.

LOWER COSTS — Outage costs add up quickly. Put an end to outage mishaps with real-time discovery and key analytics.

Entuity Includes Everything You Need to Manage Your Digital Environment:

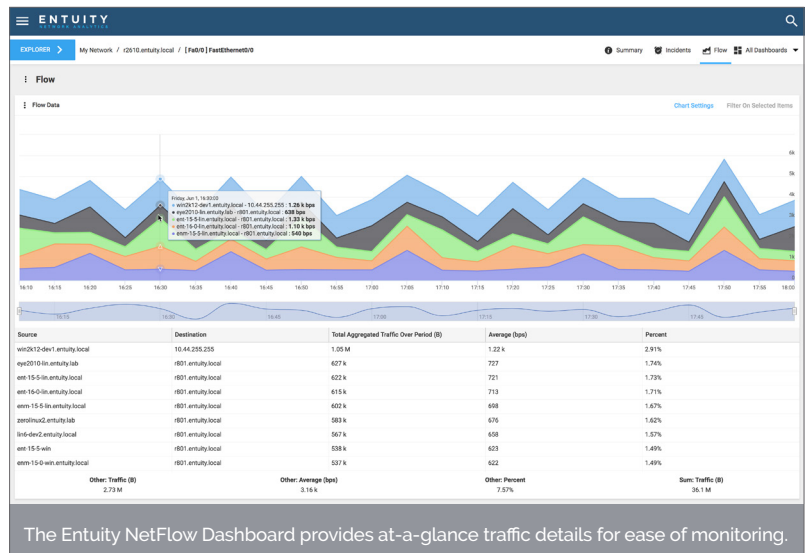

- Auto Discovery and Inventory
- Surepath Application Path Monitoring
- Live Topology and Geographic Maps
- Events Management
- Root Cause Analysis
- Configuration Management and Monitoring
- Multi-Cloud Support — AWS, Azure
- Seamless and Infinite Scalability
- Elemental Performance
- Integrated Traffic Flow, NBAR Support
- Customizable Reporting/Dynamic Dashboards
- Integrated Virtual/Physical Management
- 100% Mobile Responsive
- Third Party Vendor Integrations Available

Uncommon Versatility — Integration with Industry Leaders Adds More Value

Entuity can easily be integrated with industry leaders such as BMC Software, VMware, Dell, ServiceNow, Splunk and Moogsoft delivering a uniform way to share network infrastructure data with application monitoring for a far-reaching management platform.

Entuity Built-In Modules Supply Specialized Functionality

Entuity contains modules for specific management capabilities: SurePath Application Monitoring, IBM BladeCenters, QoS, MPLS, Firewalls, Cisco Unified Communications Manager, Cisco IPSLA, Wireless, Cisco ACI, High Availability, Routing Protocols and VPN Gateways.

Network Management for Today and Tomorrow

Representing a solid alternative to multiple disparate network tools and expensive platform solutions, Entuity is known for its short training time and ease of management and administration. It adapts to how you wish to manage your environment and is up and running within hours. For more information visit: Entuity.com

Since 1991, Park Place Technologies has simplified the management of complex hybrid IT environments to maximize Uptime, improve operational speed, eliminate chaos and accelerate business transformation.

In addition to ParkView Managed Services™, Park Place Technologies provides exceptional global service and support for data center storage, server and network hardware for all tier one OEM equipment. Park Place supports 110,000+ data centers in 154+ countries for more than 21,000 clients. Our worldwide network of 1,158,000 parts stored regionally, locally and on-site, allows for fast parts distribution and service to help drive Uptime.
