# Secure your stimulus funds— and your network's future

COVID-19 changed business and education delivery models overnight. An increasingly remote workforce and hybrid/remote classrooms have placed unprecedented demands on network infrastructures and budgets.

While the Government has approved over $900 billion through the Consolidated Appropriations (CARES) Act, understanding the law and accessing these stimulus funds can be a confusing process.

CommScope is here to help through our **RUCKUS Funding Support Program**. CommScope offers this free consultative support to ensure businesses and communities secure the public funding they need in order to tackle these new connectivity demands now and to prepare for a post-pandemic world.

COMMSCOPE

Funding Support
PROGRAM

Benefits

CommScope's RUCKUS Funding Support Program is a free no-obligation resource to support your organization with:

1. **Identifying funding sources.** We have partnered with a national grants development services firm to provide custom funding reports that help you understand what funds are available.

2. **Navigating the application process.** CommScope's RUCKUS Funding Support Program guides you through the application process, helping you to secure and maximize grant funds.

3. **End-to-end support.** CommScope's dedicated RUCKUS team is trained and ready to support businesses and communities in accessing public funding and help answer all their questions.

Why CommScope and RUCKUS?

To meet the steeper networking demands of a post-COVID world, CommScope offers through our RUCKUS portfolio of Wi-Fi solutions:

- **High-density indoor-outdoor networking solutions.** We can help your network meet capacity challenges in a cost-effective manner. Due to the pandemic, Wi-Fi connectivity is now demanded in places that it was not needed before. RUCKUS access points provide secure, reliable and economical access in the toughest indoor and outdoor environments. Every RUCKUS AP features patented technologies to ensure superior connectivity and awesome user experiences.

- **Network scalability.** We make it easy to grow your network at every level, from the AP to your core switching, all while also offering a cloud-managed solution that supports a wide range of Wi-Fi 6 (802.11ax) and Wi-Fi 5 (802.11ac) APs and ICX switches to meet the most demanding requirements.

- **Commitment to our customers.** CommScope cares and we believe in the value of community. Through initiatives like our Rapid Deployment Unit, our RUCKUS experts work closely with the Technology Disaster Resource Center (ITDRC) to donate and deploy wireless connectivity in disaster zones around the globe. We feel it is no less important help your agency or organization to navigate through the CARES Act funding process so you can fulfill your public mission.
