

# Empower Modern Care with Samsung and CDW

Deliver smarter, more connected healthcare with secure mobile solutions built for clinical workflows, patient engagement and operational efficiency.

Healthcare organizations face rising pressure to expand virtual care, improve outcomes and maintain compliance — without disrupting delivery. Clinicians need mobile tools they can trust. Patients need simple, secure ways to stay connected. Samsung and CDW help turn pressure into possibility with scalable, preconfigured technology that works across care settings.

## Advanced Healthcare Solutions

### Digital Care Delivery

Digital health technologies inform better decisions and provide new options for prevention, early diagnosis and disease management. Solutions that assist in diagnostics, treatments and clinical management can also enable more efficient, cost-effective care.

### Connected Patient Journey

A comprehensive solution that empowers continuous care. From routine checkups to critical moments, make healthcare accessible from anywhere — at home or on the go. Our services adjust to meet patients' changing needs and unite care points into a single personalized plan. That means greater independence for patients and more efficient workflows for healthcare teams.

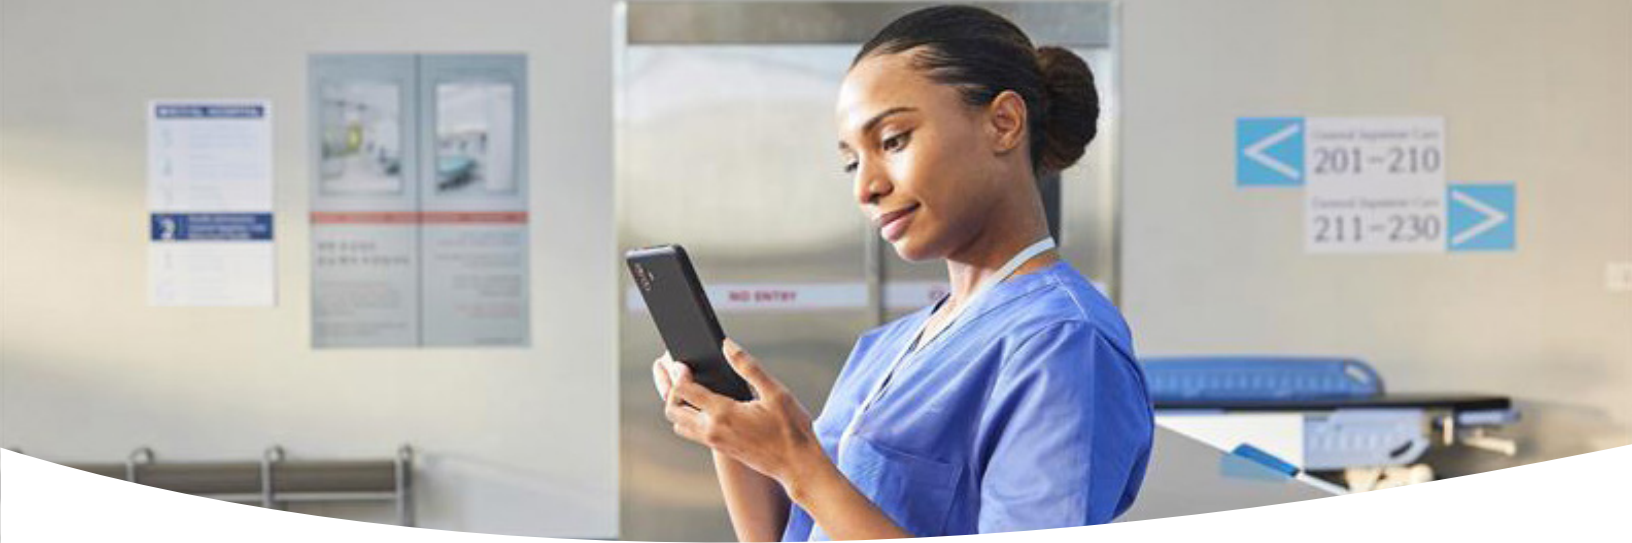

### Efficiency at the Point of Care

Streamline clinicians' work so patients receive better care. Don't leave your team bound to the tech they've got; upgrade them to the tech they need. Samsung's customizable hardware and APIs adapt to patients' and clinicians' unique situations and provide access to all patient data on a single device. This streamlines workflows and reduces burnout — all of which leads to better patient care.

## Why CDW?

CDW brings proven healthcare IT experience and end-to-end services that help you modernize with confidence:

- Extensive expertise in clinical mobility and large-scale device rollouts
- Preconfigured Samsung devices tailored for provider and patient use
- Secure deployment and mobile access management across care teams
- Long-term support to maintain uptime, compliance and user satisfaction

## Healthcare Technology Solutions

Samsung and CDW's healthcare solutions help deliver more informed, comfortable, personalized patient care.

### Remote Patient Monitoring

- Connected Galaxy tablets preloaded with health tracking and virtual visit apps
- Devices delivered to patients fully configured and branded

### Mobile Care Teams

- Samsung rugged tablets and phones designed for EMR workflows
- Easy-to-carry devices for rounding, triage or in-transit care
- Streamlined access to clinical systems and care-coordination tools

### Patient Engagement

- Devices preconfigured with easy-to-use interfaces and care content
- Ideal for bedside education, discharge planning and recovery support
- Improves comfort, clarity and patient satisfaction

### Security and Compliance

- Samsung Knox makes mobile security effortless. Samsung hardware is built secure — from the design to manufacturing to the moment we put it in your hands, and for years of use beyond
- Government-certified encryption and mobile access safeguards
- Built-in support to help with HIPAA-aligned workflows

## Mobility That Scales with You

Samsung's healthcare device ecosystem adapts to hospitals, clinics and home health models. Combined with CDW's consultative support and deployment services, you can accelerate your digital health strategy while protecting the care experience.
