

Compliance Monitoring

A better way to stay connected

Ensures individuals under supervision can more easily stay connected to a government program in a low-profile way.

With Samsung's mobile device at its core, the Compliance Monitoring solution delivers greater capability in a multi-functional device.

Individuals have the tools they need in the palm of their hands to thrive, while navigating the system and staying accountable. From tracking health conditions to monitoring compliance with agency sanctions, smartphone solutions provide quick access to community resources and enhanced communication services that will advance lives.

Key features

Multi-functional mobile device gives individuals under supervision access to the social services they need

Biometric integration for identity and verification (fingerprint and face ID)

GPS tracking in kiosk mode to monitor individual whereabouts

Easy communications and videoconferencing for agent interactions, meetings and court hearings

Knox security platform from the chip up provides the endpoint security needed

Knox Manage offers mobile device and solution management

Immigration and customs enforcement

Provide individuals with a mobile device pre-configured with the information they need to navigate the immigration process and stay better connected to the government system

Federal bureau of prisons / parolee monitoring

As a more cost-effective, low-profile alternative to body-worn devices, a mobile device enables GPS tracking, videoconferencing and messaging to make it easier for individuals under parole to comply with conditions for release

Health disease tracking

Track patterns of disease among groups entering the country and pinpoint any health conditions that require follow-up care
