

Tactical Edition

The military smartphone tested and proven by operators

The Samsung Tactical Edition portfolio of devices provides the durability, functionality, processing power and security required for precision military operations.

Combining a COTS Samsung smartphone with a custom ROM, Tactical Edition smartphones are purpose-built to connect with tactical radios and mission systems.

The resulting solution heightens situational awareness for greater command and control in any operating environment.

Key features

One device for mission planning, training, operations, and daily enterprise use

Persistent communications in multi-domain environments

Enhanced situational awareness for a real-time, accurate common operational picture

Seamless connectivity with tactical radios and mission systems

Simple integration with external image feeds, drone feeds, laser range finders, and external GPS

Night Vision and Stealth Modes and Covert Lock to support discrete operations in contested environments

Fire control/ close air support

Run multiple mission applications in the field including ATAK, APASS and more to coordinate close air support missions while maintaining real-time situational awareness of friendly troops and assets on the ground

Classified missions

Certified as a Commercial Solution for Classified Use (CSfC) Tactical Edition features Covert Lock, a DualDAR architecture with two layers of data encryption, and advanced VPN Chaining facilitating the confident security of up-to Top Secret level data

Drone controller

Multi-ethernet and WIFI capabilities, laser range finders, and external GPS provide dedicated connections to control and receive live video feeds from Unmanned Aerial Vehicles (UAVs) and man-packed drones for a complete operational view
