

# Transforming devices into business tools faster and easier than ever.

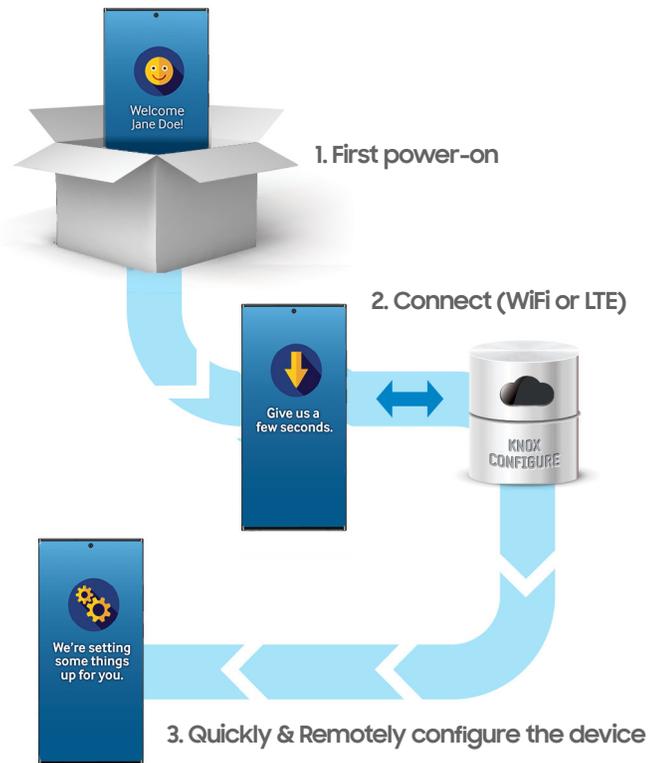

**Knox Configure**, a cloud-based solution that can be used to transform standard Samsung devices (smartphones, tablets and wearables) over-the-air into purpose-built appliances so that they fit any customer's specific business needs.

**Knox Configure is available in two editions, to give you exactly what your business needs.**

**Set Up Edition:** is designed for customers who want to rebrand devices for their own consumers out of the box. It's one-time deployment of apps and settings to enrolled devices without incremental updates.

**Dynamic Edition:** is designed for IT administrators to configure and customize devices for their employees, not only out of the box but also dynamically over the air. It allows you to deploy and update enrolled device policies as many times as needed. Dynamic edition includes all the policies and settings available in the Setup edition, plus many more.

Knox Configure makes bulk configuration simple. Your company will have specialized devices designed to maximize productivity, and you'll have them faster and easier than ever.

## Set Up Edition: Frictionless Out-of-the-Box Setup

### Automated Provisioning

Instant start after Setup Wizard with configuration after factory reset.

### Default Setting Change

Customize Ringtone, Font Style, Time Zone, Language and more.

### Bloatware Removal

Disable unnecessary preloaded apps to save space.

### Rebranded Software

Embed your company's logo and business apps in the devices.

### Customizable Home Screen

Change wallpaper, apps and widgets.

### App Deployment

Install, autolaunch and prevent uninstallation of apps.

### Access to Corporate Services

Add contacts and bookmarks.

## Dynamic Edition: Dynamically Configure and Customize

### Professional Kiosk Mode

Lock down device to specific app with a passcode-based exit.

### Key Action Changes

Hardware Key Remapping.

### Specialized System UX

Automatically boot up devices when connected to power source.

### Stay Awake Mode

Prevent Sleep mode when plugged in.

### Advanced Device Configuration

Change a wide range of device settings at the granular level.

### Connectivity Settings

Full control over wireless connections and settings.

### Dynamic Update

Update apps and configuration.

### Device Feature Restriction

Restrict features like camera, microphone, recording and more.

### Skip Setup Wizard

Google/Samsung/Carrier steps can be skipped.

### Premium Knox Features<sup>1</sup>

Cloud-based management and app/URL whitelisting/blacklisting.
