

# Smart Manufacturing Starts Here

With the rise and adoption of Industry 4.0, manufacturing today is all about data — how to gather it, analyze it and leverage it to streamline operations, prevent downtime and empower employees across every role.

Samsung and CDW can help you transform operations from the back office and the warehouse to the factory floor with secure mobile technology built for today's manufacturing organizations.

## Accelerate Innovation with Samsung and CDW

Samsung and CDW deliver purpose-built, mobile-first technology designed for the demands of modern manufacturing — enabling connected operations, safer environments and real-time production optimization.

- **Improve workflow efficiency.** Mobilize teams with ruggedized devices for on-the-go access to data, apps and remote diagnostics.
- **Power the smart factory.** Leverage automation and edge computing to reduce downtime, monitor performance and scale productivity.
- **Enhance safety and compliance.** Keep workers safe with remote monitoring, real-time alerts and Samsung Knox-secured devices.

### WHY CDW FOR MANUFACTURING?

- Experience across large-scale OT/IT deployments
- Smart factory strategy and solution consultation
- End-to-end lifecycle management
- Expertise in automation, IoT and digital twin integration

## What Sets Samsung Apart?

- **Rugged mobility.** Galaxy Tab Active, XCover and wearable devices built for demanding environments
- **DeX for Desktop.** Replace workstations on the factory floor
- **Samsung Knox.** Protects data integrity in mission-critical workflows
- **Seamless integration.** Easily ties into MES, ERP and legacy systems

## Use Cases

- **Connected factory floor.** Enable remote control, maintenance alerts and real-time inventory tracking
- **Worker safety and compliance.** Leverage mobile incident reporting, environmental sensors and emergency alerts
- **Efficient manufacturing enablement.** Use mobile access and rugged solutions to reduce waste and boost throughput

## Ready to modernize manufacturing?

# Streamline Transportation with Secure, Scalable Fleet Technology

With rising costs and staffing challenges, fleet managers need to empower drivers, improve operations and reduce total cost of ownership. Together, Samsung and CDW equip transportation companies with intelligent mobile solutions to improve fleet performance, enable safe driving and streamline logistics.

- **Enhance driver productivity.** Rugged, easy-to-mount tablets and phones streamline routing, inspections and communication.
- **Improve retention and safety.** Provide drivers with intuitive technology that reduces fatigue and improves retention through better experiences.
- **Streamline compliance.** Manage ELD activities, DVIRs and OS&D claims seamlessly.
- **Optimize fleet operations.** Enable real-time tracking and instant data sharing with secure, manageable devices.

## WHY CDW FOR TRANSPORTATION?

- Proven experience with large and distributed fleets
- Custom MDM configuration and rollouts
- 24/7 deployment logistics and driver support
- Regulatory and ELD-compliant mobile solutions

## What Sets Samsung Apart?

- **Fleet-ready devices.** Rugged tablets and smartphones with glove-compatible screens, high-resolution cameras, enhanced GPS and PTT communication
- **Samsung Knox Suite.** The all-in-one solution built for enterprise mobility
- **Turnkey integration.** Compatible with leading ELD, TMS and route optimization software

## Use Cases

- **Fleet visibility and optimization.** Track driver behavior, fuel use and delivery progress in real time.
- **Driver enablement.** One device handles dispatch, logging, navigation and safety checks.
- **Mobile security at scale.** Centralized device management ensures compliance, security and easy replacement.

## Drive transformation in your fleet.
