Samsung Smart Signage

QMR-B | QMT 4K UHD Series

Display any content in ultra-high definition with incredibly rich color on slim, efficient signage

Deliver big, bright, beautiful 4K messages, night and day. 4K picture quality, 3840 x 2160 UHD resolution gives you sharp, easy-to-see images and text, and even lower resolution content looks better, thanks to intelligent UHD upscaling. Dynamic Crystal Display enables a color range 64 times wider than conventional UHD displays, for colorful lifelike images full of subtle shades and detail. This premium signage display adds 500-nit brightness along with an anti-glare panel, which allows information to be easily seen even in brightly lit environments. 24/7 runtime ensures reliable, continuous delivery of your messages, and content management is made simple with the Samsung Smart Signage Platform (SSSP). Featuring an integrated SoC (System on Chip) media player and MagicINFO, there's no separate media player or PC required. It's an advanced all-in-one signage solution that allows you to easily create, edit and manage content. The Samsung QMR-B/QMT series displays. They will leave a lasting impression on your customers.

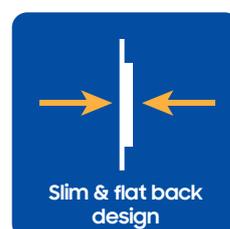

Key Highlights

- Engage customers with lifelike images through ultra high-definition resolution
- Deliver UHD-level picture quality even with lower resolution content through Crystal Processor 4K supporting advanced UHD upscaling technology
- Dynamic Crystal Display allows viewers to enjoy a wider spectrum of colors, up to one billion shades
- Symmetrical, slim design simplifies installation and complements any environment
- Reliable, non-glare panels provide better visibility from all angles, anytime of day allowing businesses to deliver accurate information 24/7
- Integrated SoC (System on Chip) media player for easy content management and playback without an external set-back box or PC.

Why Samsung's QMR-B / QMT series for your Business?

The QMR-B/QMT minimalist slim design, clean cable management solution, continuous operation capability and IP5X certification make them ideal for retail stores, office spaces, public spaces and more.

The Dynamic Crystal Display allows viewers to enjoy a wider spectrum of colors, up to one billion shades for more lifelike images, while true Ultra HD 4K color, 500-nit brightness and a non-glare panel ensures every word and image is as legible as it is impressive even in bright ambient light. Additionally, UHD Intelligent Upscaling enhances standard and high-definition content to the best possible picture quality, while the SMART Signage Platform 6.0 features an embedded media player, for easy content management and playback without an external set-back box or PC.

Key features

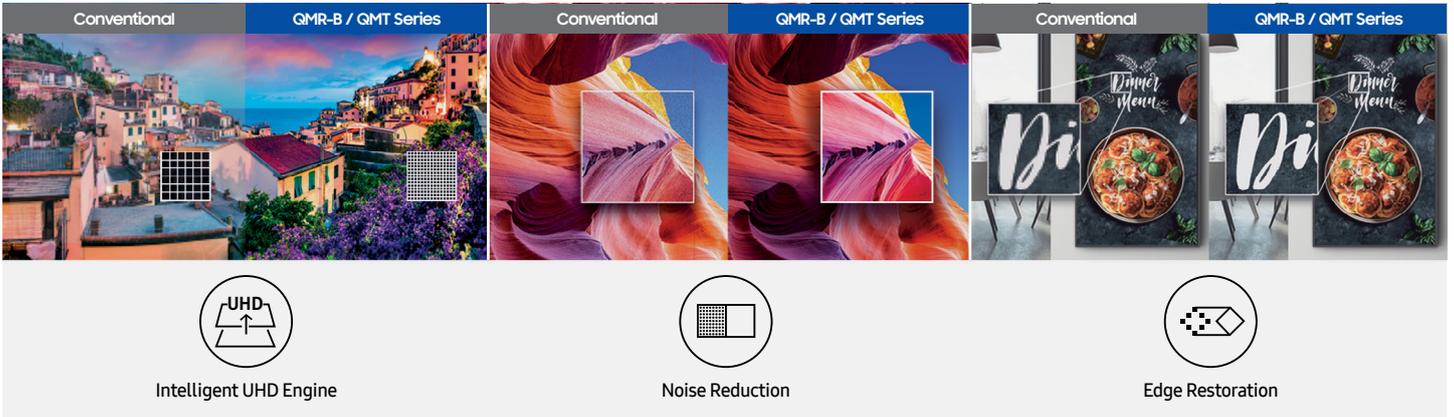

Incredible 4K picture quality

Samsung's new QMR-B and QMT series is able to capture customer attention by providing an incredibly clear picture, showcasing lifelike images and intricate details better than ever before thanks to ultra high-definition 4K resolution.

Bright non-glare display

When clear visibility is essential, the QMR-B and QMT series incorporates key features including up to 500 nit brightness and reliable, non-glare panels that provide better visibility from all angles, anytime of day. The display is ideal for locations such as airports and commuter stations where 24/7 access to clear and accurate information is crucial.

Crystal Processor 4K

Samsung's global leadership in display technology and picture quality spans more than a decade. Thanks to superior semi-conductor technology, Samsung has developed the powerful video processor available. Additionally, intelligent UHD upscaling technology is a cutting-edge solution based on Samsung's proprietary UHD Processor that allows content developed at a lower resolution to be elevated to UHD-level quality. It also performs edge restoration and noise reduction to optimize on-screen text and imagery with crisp edges and fine detail.

Dynamic Crystal Display

Dynamic Crystal Display is what brings the incredible, lifelike color to Samsung displays. Using 10-bit processing, the displays are able to showcase a wider spectrum of colors — up to a billion different shades — capturing subtle differences for flawless color expression, critical to businesses in ensuring brand consistency across communication channels.

Key features

Slim and symmetrical design

The all-new slim and symmetrical design of the QMR-B and QMT series significantly simplifies wall mounting the display and ensures installation is a seamless process. The display's power inlet direction has been redesigned to sit flush against the wall. The new design sets guarantees a long life cycle ensuring the QMR-B and QMT series will stand the test of time.

Clean cable management

In a corporate or retail environment, the back of a display is often visible to customers. With the QMR-B and QMT series' new cable guide feature retailers can tuck messy cables away from view. This allows for a clean and more visually-appealing customer shopping experience.

Samsung Workspace secured by Knox

Samsung Workspace is a powerful new feature fortified by proprietary Knox security technology allowing users to create an enhanced virtual collaboration workspace without needing a PC in the room, or any physical connection. Simply connect a keyboard and mouse to the display and immediately get to work accessing a PC remotely or web based cloud services such as Microsoft Office 365 and VMWare Horizon.

* Samsung Workspace feature support may vary by region and market conditions.
* The scheduled availability of this feature varies by model.

Powerful, all-in-one solution

The Samsung SMART Signage Platform (SSSP) is an open-source, all-in-one solution embedded in Samsung SMART signage that simplifies installation and maintenance. With SSSP, there is no need for any external devices to communicate with the server or play digital media enjoying easy development, reinforced capability with multiple web formats, and secured protection.

Wi-Fi built-in

The QMR-B and QMT series features a nearly endless range of business use cases thanks to built-in Wi-Fi. Wireless connectivity simplifies how businesses showcase content.

* Image is for illustrative purposes only, specific application or program may have to be developed for the depicted usage scenario.

Industry standard certified

QMR-B displays are EMC class B compliant, providing a safe and healthy viewing environment by meeting strict standards of electromagnetic wave emission and assuring reliable operation even near other electronic equipment. The displays are also registered by EPEAT, the global ecolabel for IT, confirming the hardware is sustainable for the full product lifecycle, from design and production to energy use and recycling.

* QM85R and QM98T have EMC class A certification and not registered by EPEAT.
