Why Shopify POS?

Experience Omnichannel Retail, done right

With Shopify POS, omnichannel features are BUILT-IN. No integrations. No APIs. It's what we do, and it's what your customers expect. Buy online, pick-up instore, endless aisle, buy online/return or exchange in-store, multi-channel gift cards, and much more. Integrated POS software, hardware, and payments - online, and offline.

Turn your staff into selling superstars

Staff has real-time access to accurate information about inventory, orders, customers, and more, directly from any POS device. And, with Shopify POS, powerful clienteling, CRM and marketing tools are included, so you can make the most of customer and prospect data.

Drive efficiency across your business

Powerful forecasting and inventory management tools let you optimize stock levels across locations. Centralized OMS enables you to streamline your supply chain. Centralized staff management, permissions, training and performance tracking tools streamline operations across large teams.

Grow with confidence

Easily expand to new markets and experiment with new retail channels using native POS features. Leverage Shopify's powerful partner network to customize your POS, with access to more than 10k+ apps in the Shopify App Store and more than 40k+ trusted solution partners.

“

Shopify POS has unlocked omnichannel experiences for us, like seamlessly bringing up a customer's online purchases in a retail store. POS is also reliable and user friendly, allowing us to spend more time building differentiating features for our business and less time on tech support.
